## CHAPTER-I

### INTRODUCTION

1.1 The present quarterly Employment Review relating to the period January-March, 1992 is based on the statistics collected under the Employment Market Information (EMI) Programme of the Directorate General of Employment & Training, Ministry of Labour, Government of India.

1.2 Under the EMI programme information is collected on the level of employment in the organised sector of the economy, which comprises all establishments in the public sector and non-agricultural establishments employing 10 or more persons in the private sector. Whereas data from all the establishments in the public sector and those non-agricultural establishments in the private sector employing 25 or more persons are obtained statutorily under the provisions of the Employment Exchanges (compulsory Notification of Vacancies) Act, 1959, the data from non-agricultural establishments engaging 10 to 24 persons in the private sector are collected on a voluntary basis.

1.3 Collection of data under the programme is through the 'Establishment Reporting System'. All the establishments are required, at quarterly intervals, to supply details about the number of persons they are employing, vacancies occurred and the type of persons who are in short supply. The information relates only to 'Employers' and 'Employees'. The term 'Employers' means owners, proprietors, managers, working partners or directors of the firms/companies. On the other hand, 'Employees' include all those persons whose wages or salaries are paid from the establishments but does not cover part-time employee and apprentices. The EMI programme does not cover the following sectors:-

- i) Self employed or independent workers.
- ii) Agricultural and allied operations in the private sector, except for plantations which are covered on a voluntary basis.
- iii) Household establishments.
- iv) Non-agricultural establishments in the private sector employing less than 10 workers.

- v) Employment in Indian Missions/Embassies abroad, Defence forces and those not covered due to administrative reasons, and
- vi) The smaller establishments employing 10-24 persons in the private sector in the metropolitan areas of Greater Bombay and Calcutta (which are not covered due to practical difficulties).

1.4 As far as geographical coverage is concerned, the EMI Programme is in operation in all States/Union Territories of the country except Sikkim, Arunachal Pradesh, Dadar and Nagar Haveli and Lakshdweep. The programme has not been extended to these States/Union Territories so far.

1.5 The programme has the following limitations:-

- i) The frame of establishments maintained at the Employment Exchanges is not comprehensive in certain cases, and
- ii) Employment in respect of non-responding establishments had to be estimated.

1.6 The processing of the data for the present review was based on the quarterly returns received for the quarter ending 31st March 1992. The data may undergo a minor change when employment at three digit level of NIC is finalised. In view of this, the data reported in the present review may be treated as provisional.

CHAPTER - II

OVER-ALL EMPLOYMENT SITUATION IN THE  
ORGANISED SECTOR

ESTABLISHMENTS

The number of establishments in the organised sector which were addressed for employment data, during the quarter ended March, 1992 had gone up to 259.86 thousands. Out of these establishments, 152.34 thousands were in the Public Sector and the remaining 107.52 thousands were in the Private Sector. The number of establishments at the end of March, 1992 by branches of public sector, and size of establishments in the private sector alongwith percentage changes over corresponding quarter of the last year are presented in the following Table-I.
