CHAPTER-II

EMPLOYMENT MARKET INFORMATION PROGRAMME

OBJECTIVES

- 2.1 The main objectives of the Employment Market Information (EMI) Programme are: -
- I) to provide information at short intervals about the structure of employment in the public and private sectors at the area, state and national levels and also to monitor the changes in the level of employment.
 - II) to present occupational composition and educational profile of employees in the public and private sector establishments.
 - III) to identify the occupations which are characteristic to a given industry.
 - IV) to assess the manpower shortages in the organised sector.
 - V) to make available information required to improve and add to the services offered by the National Employment Service.
 - VI) to monitor the progress in generating employment during the five year Plans.

COVERAGE

- 2.2 The EMI programme was initiated in the year 1955 as a Pilot Project in Delhi, which was subsequently extended to selected areas (Districts) in various States during the Second Five-Year Plan period. The Programme has provided a statutory base with the enactment of the Employment Exchanges (Compulsory Notification of Vacancies) EE (CNV) Act 1959. The data collected under the EMI programme covers only the Organised Sector of the economy which inter-alia covers all establishments in the Public Sector irrespective of their size and non-agricultural establishments in the Private Sector employing 10 or more persons. While the information from non-agricultural establishments in the Private Sector employing 25 or more persons is collected under the provisions of EE (CNV) Act 1959, data from the establishments employing 10-24 persons is collected on a voluntary basis.
- 2.3 Under the EMI programme collection of data is done following the "establishment reporting system". The establishments are required to furnish at regular intervals details about the number of persons they employ by sex, vacancies that have occurred and the type of persons, which are in short supply. This information relates only to 'Employers' and 'Employees'. Employers include Owners, Proprietors, Managers, Working Partners, or Directors of Firms/Companies who work full time for the firms/companies.

GEOGRAPHICAL COVERAGE

- 2.4 The EMI Programme is being implemented in all the States and Union Territories of the country except Arunachal Pradesh, Sikkim, Dadra & Nagar Haveli and Lakshadweep. The programme could not be extended to these States/UTs so far due to administrative reasons. The smaller establishments employing 10-24 persons in the Private Sector in metropolitan areas of greater Mumbai and Kolkata are also not being covered owing to administrative reasons.

REFERENCE PERIOD

- 2.5 The EMI data are furnished by the establishments through ER-I and ER-II returns. The form ER-I is used for the collection of information from the establishments at quarterly intervals i.e. 31st March, 30th June, 30th September and 31st December of each year.

ORGANISATION OF THE PROGRAMME

- 2.6 The information collected through ER-I is scrutinised, tabulated and disseminated at the area, state and national level. The employment exchanges prepare Area Employment Market Reviews to indicate employment situation in the organised sector within the district. The State Directors of Employment also prepare state level Employment Reviews showing employment situation prevailing at the State level. At the National level, Employment Reviews are prepared annually by the Directorate General of Employment and Training projecting the overall picture of Employment in the organised sector in different States/UTs. The present Employment Review provides information regarding employment in the organised sector during the period 2001-2002. The National Industrial Classification (NIC) 1987 was followed in classifying the employment data by industries.

LIMITATIONS OF EMI DATA

- 2.7 **The EMI Programme does not cover: -**
- a) Employment in the un-organized sector.
 - b) Self Employment

- c) Employment created under various employment/beneficiary-oriented schemes/programmes viz. NREP, RLEGP, IRDP, TRYSEM. etc. might be erroneously reported under the EMI Programme.

CHAPTER – VII

LABOUR MARKET

- 7.1 Generally, Labour Market is termed as an area where workers in search of employment and employers in need of workers come in contact with each other or meet. This may be local, regional, provincial, national or even inter-national. The proper appraisal of the Labour Market envisages a regular study of the various economic, social, institutional and cultural factors such as quantum and composition of the labour force, level of education, training and skills, behavioral aspects of job-seekers and employers, mobility, recruitment practices, prevailing wage levels, traditions and institutional barriers, etc.
- 7.2 In this Chapter, an attempt has been made to bring together data flowing from day-to-day operations of the National Employment Service relating to work-seekers, vacancies notified, etc. and the Employment Market Information (EMI) Programme of the D.G.E.&T., Ministry of Labour, Government of India regarding the number of persons employed, as both these sets of data taken together have a close bearing on the labour market situation prevailing in our country.
- 7.3 The Employment Exchange statistics provide only a broad indication of the unemployment situation in the organised labour market. Before drawing any conclusions the following limitations of the Employment Exchange statistics as indicators of unemployment in the country must be kept in mind:-
- (i) All persons registered with the Employment Exchanges are not necessarily unemployed. Quite a number of them are already in employment and have registered their names for better and more suitable jobs.
 - (ii) Registrations being voluntary, all unemployed persons do not register themselves with the Employment Exchanges.
 - (iii) Some work-seekers registered at the Employment Exchanges who secure employment subsequently through sources other than the Exchanges do not get their names deregistered.
 - (iv) Though many persons residing in rural areas also register themselves with Employment Exchanges but as the Employment Exchanges are mostly located in urban areas the rural registrants are not likely to get properly represented in the Live Register.
 - (v) Many students, who normally are not considered a part of the labour force, also register themselves for employment assistance primarily with a view to gaining seniority in registration.
 - (vi) Some work-seekers register their names with more than one Employment Exchange.

GENERAL LEVEL OF UNEMPLOYMENT

7.4 On the basis of the data available from the 55th Round of the NSS (1999-2000), unemployment was estimated to be around 10 million according to Usual Principal Status (UPS), 17 million according to Current Weekly Status (CWS) and 26 million person years according to Current Daily Status (CDS). As a percentage of the Labour Force, unemployment rates according to the three concepts works out to 2.8, 4.4 and 7.3 respectively (Table-19). The unemployment rates are much higher for the urban areas than for the rural areas. Further, Unemployment rates among rural males is higher than that of rural females, while in urban areas this trend is reversed, i.e. unemployment rate is higher among urban females than among urban males irrespective of the approach followed.

TABLE -19

	1999-2000	7.2	7.0	7.2	7.3	9.4	7.7	7.3

Source:- National Sample Survey Organisation (N.S.S.O)

UPS-Usual Principal Status: A person is considered unemployed according to this concept if he/she was available for work but without work for a major part of the year.

CWS-Current Weekly Status: A person is considered unemployed according to this concept if he/she though being available for work did not have work even for one hour during the reference week.

CDS-Current Daily Status: It is a measure of unemployment in terms of person days of unemployment of all the persons in the Labour force during the reference week.

- 7.5 The magnitude of unemployment in the country in absolute terms has been increasing over the years and at the same time, unemployment as percentage of labour force has also been increasing while chronic unemployment as revealed by the UPS criteria has only marginally increased from around 2.6 percent in 1993-94 to 2.8 percent in 1999-2000. The overall unemployment (both chronic and intermittent unemployment taken together) has increased from 3.6 percent to 4.4 percent as per CWS criteria and from 6.0 percent to 7.3 percent as per CDS criteria. An important trend observed in case of urban females is that unemployment rate for them has gone down during 1999-2000 as compared to 1993-94 irrespective of the approach followed.

WORK-SEEKERS

7.6 The number of work-seekers on the Live Register of Employment Exchanges in the country has gone up from 363.44 lakh at the end of March 1993 to 415.96 lakh at the end of March 2002. The number of men and women on the Live Register of Employment Exchanges and the percentage changes over the years are presented in the following Table: -

It may be observed from the Table-20 that there has been an increase in the number of job seekers registered with the Employment Exchanges over the years from 1993 to 2002. The number of work-seekers registered with the Employment Exchanges has gone up from 412.32 lakh at the end of March, 2001 to 415.96 lakh at the end of March, 2002 recording an increase of 0.9%. DISTRIBUTION OF EDUCATED JOB-SEEKERS

7.7 All types of persons approaching Employment Exchanges for seeking employment assistance are registered by the Employment Exchanges in accordance with their educational qualification and skills. Educated job seekers i.e. those who are matriculates and above form a significant segment on the Live Register of Employment Exchanges. Providing employment to educated job seekers poses relatively more intricate problem than to those in the uneducated category, as most of the educated people are generally desirous of seeking white-collar jobs. The following Table-21 presents the number of educated job-seekers classified by sex and educational qualifications:

TABLE-21

DISTRIBUTION OF JOB-SEEKERS BY EDUCATIONAL LEVEL AND SEX **AT THE END OF DECEMBER 2000-2001**
