2. This Review focuses on the employment situation that prevailed in the organised sector during the years 1990-95 and is likely to be of utility in the areas of vocational guidance, educational planning, craftsmen and technical training, manpower planning and monitoring of employment generation.

3. I am thankful to all employers for their cooperation in furnishing the requisite information through the employment returns prescribed under the Employment Exchanges (Compulsory Notification of Vacancies) Act & Rules framed thereunder. I am also grateful to the Directorates of Employment of various States and Union Territories and their officers and staff, as also to the EMI Units of the Employment Exchanges for their active participation and whole hearted devotion & cooperation in the course of field enquiries.

HIGHLIGHTS

1.1 The present Employment Review is twenty-sixth in the series of Annual Employment Reviews being published by the Directorate General of Employment and Training (D.G.E.& T), Ministry of Labour, Government of India, and pertains to the year ended 31st March, 1995. This Review is based on the information collected by the network of Employment Exchanges in the country under the Employment Market Information (EMI) Programme of the D.G.E.& T., which was initiated more than thirty-five years ago.

COVERAGE OF EMI PROGRAMME

1.2 The EMI Programme relates to the "organised sector" of our economy. This organised sector covers all establishments in the public sector, irrespective of their size and non-agricultural establishments in the private sector employing 10 or more persons. Accordingly, information in respect of all the public sector establishments and non-agricultural establishments in the private sector employing 25 or more persons is collected statutorily under the provisions of the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959 and information from smaller non-agricultural establishments in the private sector employing 10-24 persons is collected on voluntary basis.

ESTABLISHMENTS GROWTH

1.3 There were 2.77 lakh establishments on the Employer's Register of Employment Exchanges at the end of March 1995. Of these, 1.64 lakh were in the public sector and the remaining 1.13 lakh in the private sector. The public sector establishments increased from 1.58 lakh at the end of March, 1994 to 1.64 lakh at the end of March, 1995, recording a growth of 3.6%. All branches of the public sector recorded growth in the number of establishments barring Local Bodies. The growth of establishments in the private sector was of the order of 4.5%. The growth of larger establishments was recorded as 7.5%, which in the case of smaller establishments was 2.0%.

EMPLOYMENT GROWTH IN THE ORGANISED SECTOR

1.4 Employment in the organised sector went up from 273.75 lakh in March, 1994 to 279.87 lakh in March, 1995 recording an increase of 2.2%. The growth rate was of the order of 0.7% during the preceding year. Whereas the public sector recorded an increase of 1.3%, the private sector showed a rise of 4.6%. The increase of 1.3% in public sector employment during the period under review (1994-95) was higher as compared to 0.6% recorded in the previous year (1993-94). In the private sector, the growth of employment was 4.6% during the period under report (1994-95) as against 1.0% recorded during the corresponding period of the previous year (1993-94).

SPECIAL EMPLOYMENT PROGRAMMES

2.4 Special employment and anti-poverty programmes like Integrated Rural Development Programme(IRDP), Training of Rural Youth for Self Employment (TRYSEM), Jawahar Rozgar Yojana (JRY) and Nehru Rozgar Yojana (NRY) have been a central feature of India's development strategy. In 1993-94, two new programmes namely the Employment Assurance Scheme and the Prime Minister's Rozgar Yojana were introduced. In addition, some State Governments have special employment programmes of their own, such as the Employment Guarantee Scheme (EGS) in Maharashtra and the Self Employment Scheme for Registered Unemployed (SESRU) in West Bengal.

2.5 The EAS is implemented in 1778 backward blocks in the country. It aims at providing 100 days of unskilled manual work up to two members of a family in the age group of 18 to 60 years normally residing in villages within the blocks covered under EAS. It is a need-based programme; hence no target of employment generation has been fixed. Since 1993-94, the JRY has been made more target oriented and expanded substantially through increased budgetary allocations. It has been divided into three streams viz. (i) JRY-1st stream with 75 percent of total allocation; (ii) JRY-2nd stream with 20 percent of total allocation for 120 selected backward districts, and (iii) JRY-3rd stream for innovative projects, aimed at prevention of migration of labourers, enhancing women's employment, special programmes through voluntary organisations and those aimed at drought proofing and watershed development.

2.6 For better targeting, cost effectiveness and judicious selection of assets under JRY, the allocations for two sub-schemes of 1st stream of JRY, have been increased for the Indira Awas Yojana (IAY) from 6 percent in 1992-93 to 10 percent in 1993-94 and for the Million Wells Scheme (MWS) from 20 percent to 30 percent during the same period. Along with SC/ST and freed bonded labourers, poor non-SC/ST families have also been included for assistance under IAY and MWS subject to the condition that their share not exceeding 4 and 10 percent of allocation respectively.

2.7 Under IRDP, all families in rural areas below the poverty line are eligible for assistance. There is reservation for SC/ST up to 50 percent of total families assisted. 40 percent is reserved for women and 3 percent for those who are physically handicapped.

2.8 The achievements of the special employment programmes are given in the following table. The Scheme for Self Employment for Educated Unemployed Youth (SEEU) has been integrated with the PMRY from 1994-95. The target under PMRY for 1994-95 is fixed at 2.2 lakh micro-enterprises to generate about 4.4 lakh employment opportunities. Under JRY, about fifty percent employment generation during 1993-94 came from the SC/ST group. The coverage of SC/ST under IRDP during 1993-94 was over 53 percent of total families assisted as against the target of 50 percent. The coverage of women was 34 percent, as against the target of 40 percent.

CHAPTER -III

EMPLOYMENT MARKET INFORMATION PROGRAMME

OBJECTIVES

3.1 The main objectives of the Employment Market Information (EMI) Programme are:-

- (i) to provide information at short intervals about the structure of employment in the public and private sectors at the area, state and national levels and also to monitor the changes in the level of employment.
- (ii) to present the occupational composition and educational profile of employees in the public and private sector establishments.
- (iii) to identify the occupations which are characteristic to a given industry.
- (iv) to assess the manpower shortages in the organised sector .
- (v) to make available information required to improve and add to the services offered by the National Employment Service.
- (vi) to monitor the progress in generating employment during the five years' plans.

COVERAGE

3.2 The EMI Programme was initiated in the year 1955 as a pilot project in Delhi which was subsequently extended to selected areas (Districts) in various States during the Second Five Year Plan period . The programme was provided a statutory base with the enactment of the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959. The data collected under the EMI Programme covers only the organised sector of the economy which, inter alia, covers all establishments in the public sector irrespective of their size and non-agricultural establishments in the private sector employing 10 or more persons. While the information from non-agricultural establishments in the private sector employing 25 or more persons is collected under the provisions of EE(CNV) Act, 1959, data from the establishments employing 10-24 persons is collected on voluntary basis.

3.3 Under the EMI Programme collection of data is done following the 'establishment reporting system'. The establishments are required to furnish at regular intervals details about the number of persons they employ by sex, vacancies that have occurred and the type of persons which are in short supply. This information relates only to "employers" and "employees". Employers include owners, proprietors, managers, working partners, or directors of firms/ companies who work full time for the firms/companies.

GEOGRAPHICAL COVERAGE :

3.4 The EMI Programme is being implemented in all the States and Union Territories of the country except Arunachal Pradesh, Sikkim, Dadra & Nagar Haveli and Lakshadweep. The programme could not be extended to these States/U.Ts so far due to administrative reasons. The smaller establishments employing 10-24 persons in the private sector in metropolitan areas of Greater Bombay & Calcutta are also not being covered owing to administrative reasons.

REFERENCE PERIOD :

3.5 The EMI data are furnished by the establishments through ER-I & ER-II returns. The form ER-I is used for the collection of information from the establishments at quarterly intervals i.e. 31st March, 30th June, 30th September and 31st December of each year.

ORGANISATION OF THE PROGRAMME :

3.6 The information collected through ER-I is scrutinised, tabulated and disseminated at the Area, State and National levels. The Employment Exchanges prepare Area Employment Market Reviews to indicate employment situation in the organised sector within the district. The State Directors of Employment also prepare State level Employment Reviews showing the employment situation prevailing at the State level. At the national level, Employment Reviews are prepared annually by the Directorate General of Employment and Training projecting the overall picture of employment in the organised sector in different States and U.Ts. The present Employment Review provides information regarding employment in the organised sector at the end of the year 1994-95. The National Industrial Classification (NIC) 1987 was followed in classifying the employment data by industries.

LIMITATIONS OF EMI DATA :

3.7 The EMI Programme does not cover :

- (a) Employment in the un-organised sector.
- (b) Self-employment
- (c) Part-time employment.
- (d) Employment in agriculture and allied establishments which furnish employment returns only on voluntary basis.
- (e) Employment in house-hold sector and non-agricultural establishments employing less than 10 workers in private sector.
- (f) Employment in defence forces.
- (g) Employment in Indian Embassies & Missions abroad.

3.8 Other limitations of the EMI Programme are :

- (a) The frame of establishments maintained at local Employment Exchanges is not comprehensive in certain cases due to non-inclusion of new and emerging establishments.
- (b) There is an element of estimation of employment in respect of non-responding establishments.
- (c) Employment created under the various employment/beneficiary oriented schemes/programmes viz. NREP, RLEGP, IRDP, TRYSEM. etc. might be erroneously reported under the EMI Programme.

COVERAGE OF ESTABLISHMENTS IN THE ORGANISED SECTOR AT THE END OF MARCH, 1995

3.9 On the basis of the information furnished by the Directorates of Employment in various States and Union Territories, there were 276718 establishments borne on the Employers' Register as on 31st March, 1995. Of these, the required employment returns were rendered by 208268 establishments both in the public and private sectors. The rate of response thus works out to 75.3% during the year 1994-95.

3.10 The coverage of public sector comprises establishments of Central Govt., State Govt. Quasi Govt.(Central), Quasi-Govt.(State) and Local Bodies. In the private sector, the establishments are grouped on the basis of the number of persons employed therein. Establishments employing 25 or more persons are categorised as "larger establishments" and those employing 10 to 24 persons are termed as "smaller establishments".

The analysis of the rate of response reveals that in the public sector the highest 83.0% of the establishments in Local Bodies rendered employment return, followed by State Govt. (78.3%), Quasi-Govt.(Central) (78.1%), Quasi-Govt.(State)(78.0%) and Central Govt. establishments (73.5%). In the Private Sector, 75.4% of the Larger Establishments and 66.6% of the Smaller Establishments had sent the employment returns for the period ended March, 1995.

Establishments in the Private Sector also maintained positive growth except a marginal decrease in 1994. Further relative analysis of establishment data reflect that growth was phenomenal in State(Quasi) & Central(Quasi) Govts. and also in larger establishments being 21.2%, 19.0% and 15.8% respectively.

ZONewise ESTABLISHMENTS GROWTH DURING 1990-95

3.14 The entire country has been divided into six Zones/Regions, viz., Northern Zone, Central Zone, Eastern Zone, North-Eastern Zone, Western Zone and Southern one. The Andaman & Nicobar Islands are outside the scheme of Zonal Councils embodied in the States Reorganisation Act, 1956. Table-5 below shows the number of establishments in the six zones and in the Union Territories of Andaman & Nicobar Islands during 1990-1995.

It will be observed from the above Table-11 that during 1990-95 Primary Sector comprising Agriculture, Hunting, Forestry and Fishing and Mining & Quarrying Industry Divisions showed an over-all increase of only 2.6% in the employment. Under this sector, Agriculture, Hunting, Forestry and Fishing recorded growth of 1.1%, whereas the increase under Mining & Quarrying Division was 4.5%.

6.2 Employment growth during 1990-95 in the Secondary Sector was 5.0%. Under this sector, Electricity, Gas and Water Division recorded an employment growth rate of 7.2%. Manufacturing Division contributed an increase of 4.6%. Employment in Construction Industry, however, showed a marginal increase of about 1.4%.

6.3 The overall increase in employment in the Tertiary Sector was 7.7%. All industries in this Division recorded employment growth, the highest being in Financing, Insurance, Real Estate and Business Services (18.1%). Details of employment in the organised sector by Industry Divisions under Public and Private Sectors as on the 31st March of 1990 and 1995 are shown in Annexure-VI.

EMPLOYMENT IN PUBLIC SECTOR BY MAJOR INDUSTRY DIVISIONS

6.4 The data on employment classified by Industry Divisions and branches of Public Sector as on the 31st March of 1990 and 1995 are contained in Annexure-V. Branch-wise distribution of employment in Public Sector shows that under Central Government, all Industry Divisions recorded increase in employment excepting marginal decreases noticed under Manufacturing (Division 2 & 3), (-2.7%); Electricity, Gas & Water (Division 4) (-7.3%), Construction (Division 5) (-0.7%); and in the Transport, Storage & Communication (Division 7) (-2.6%).

6.5 Under the State Govt. Major industry divisions which suffered decrease in employment included Divisions 0,1,2 & 3 and 8 viz Agriculture (-3.3%), Mining(-11.9%), Manufacturing(-11.2%) and Financing Insurance & Business Services(-0.6%). Appreciable increase of 80.2% was noticed during 1990-95 in the State Government under Wholesale & Retail Trade and Restaurants & Hotels division, followed by 13.7% increase in the employment under Electricity, Gas and Water division and 7.4% growth in employment under Community, Social & Personal Services Sector.

6.6 In the case of establishments of Central Govt (Quasi), employment-growth of 21% each during 1990-95 was recorded in Agriculture, Hunting, Forestry and Fishing(Division 0) and in the Electricity, Gas and Water(Division 4) and 26.2% in Transport, Storage and Communications (Division 7) and 18.4% in the Financing, Insurance, Real Estate & Business Services (Division 8). The Industry Divisions under Central Govt.(Quasi) which recorded decline in employment during 1990-95 were Manufacturing (-2.2%), Construction (- 10%) and Community, Social and Personal Services (-5.8%).

6.7 In State Govt. (Quasi) Sector, the increase in employment was universally observed in all industry divisions, except a decrease of 1.5% and 9.8% noticed in the two Mining & Quarrying and Manufacturing Divisions.

6.8 Under Local Bodies, employment during 1990-95 registered a decrease of 4.7% each in the Electricity, Gas & Water (Division 4) and in the Community, Social and Personal Services (Division 9). All other Industry Divisions registered significant gains in employment, particularly 64.7% increase in Manufacturing Division, 20.4% increase in Construction Division and 31.3% increase in Transport, Storage & Communications Division, as may be seen from the contents of data in Annexure-V.

EMPLOYMENT IN PRIVATE SECTOR BY MAJOR INDUSTRY DIVISIONS:

6.9 The distribution of employment in the Private Sector as in Annexure V, classified by Act and Non-Act Establishments, by Industries/ Services Divisions, shows that amongst Act Establishments only two Industry Division (4 & 5) viz Electricity Gas & Water and Construction Division suffered fall in employment. An increase in employment was recorded in all other Industry Division, maximum (24.5%) recorded in Financing, Insurance, Real Estates & Business Services, followed by 251.5% in the case of Transport, Storage & Communications and 21.3% in Community Social & Personal Services. In so far as Industry-wise composition of employment under Non-Act Establishments in the Private Sector is concerned, all industry divisions registered gains, except fall noticed in the case of Divisions 1,5 and 6 (namely Mining & Quarrying (-8.6%), Construction (-14.6%) and Wholesale & Retail Trade and Hotels & Restaurants(-3.8%).

EMPLOYMENT IN KEY INDUSTRIES

6.10 The Organised sector employment in four key industries comprising Coal, Cement, Iron & Steel and Generation and Transmission of Electric Energy during 1990-95 is analysed on the basis of the data contained in the following Table-12:

TABLE - 12

CHAPTER - VII

WOMEN'S EMPLOYMENT

7.1 Employment of women constitutes an important component of the organised sector employment in the country. The employment of women in the organised sector has continuously been rising over the last several years. At the end of the 31st March 1995 the employment of women constituted 15.4% to the total employment in the organised sector in the country. An overview of women's employment is given in the following Table-16.

TABLE - 16

It may be observed from the above Table that women's employment in the organised sector went up from 27.93 lakh in 1980-81 to 43.04 lakh in 1994-95.

7.2 The increase in women employment during the year under review (1994-95) was of the order of 3.6% as compared to 3.2% during the preceding year (1993-94). It may be further seen from Table-16 that the percentage of women's employment to total employment in the organised sector has risen steadily from 12.2 in 1980-81 to 15.4 in 1994-95.

7.3 The employment of women in public and private sectors as on the 31st March of 1990 to 1995 and percentage changes between these years are presented in the following Table-17.

In the private sector, women's employment also registered an appreciable & substantial growth of 17.6% in "Smaller Establishments" and 22.1% in "Larger Establishments" during 1990-95.

ZONEWISE GROWTH OF WOMEN'S EMPLOYMENT (1990-95)

7.5 The women's employment in the organised sector by different zones (including their dispersal in various States/Union Territories) is presented in Annexure - IX. Based on data, the following Table - 19 shows zones-wise growth of women's employment during 1990-95.

It is equally satisfying to observe that women's employment has been reflecting an increasing trend in all six Zones of the country (excluding Andaman and Nicobar Islands). Highest increase of 25.1% was recorded in the Southern Zone followed by 20.2% in the Western Zone, 14.8% in the Northern Zone, 9.8% in the Central Zone and 9.5% in the North-Eastern Zone. Even Andaman & Nicobar Islands registered 6.5% increase in 1995 over 1990.

7.6 The distribution of women employees by States/U.Ts cross-classified by public and private sectors as on the 31st March, 1990 and 1995 is contained in Annexure IX. It may be observed from data in Annexure IX that the employment of women showed an upward trend in all the States/UTs of the country (during 1994-95) barring exception of Kerala and Madhya Pradesh.

7.7 The distribution of women's employment by major industries as on the 31st March of 1990 to 1995 is given below in Table-20:

An analysis of data on women's employment contained in the Table 20 above reveals that there was increase in women's employment in all Industry Divisions, barring Mining & Quarrying, which alone registered a slight fall of 0.1%. An analysis of the growth of women's employment reflects that Financing, Insurance, Real Estates & Business Services (Division 8) registered highest growth of 37.6% in 1995 over 1990 followed by Manufacturing (29.1%), Electricity, Gas & Water (28.3%), Wholesale & Retail Trading including Hotels & Restaurants (22.9%), Transport, Storage & Communications Services (22.3%) and Community, Social & Personal Services (17.3%).

CHAPTER - VIII

LABOUR MARKET

8.1 Generally, Labour Market is termed as an area where workers in search of employment and employers in need of workers come in contact with each other or meet. This may be local, regional, provincial, national or even inter-national. The proper appraisal of the Labour Market envisages a regular study of the various economic, social, institutional and cultural factors such as quantum and composition of the labour force, level of education, training and skills, behavioral aspects of job-seekers and employers, mobility, recruitment practices, prevailing wage levels, traditions and institutional barriers, etc.

8.2 In this Chapter, an attempt has been made to bring together data flowing from day-to-day operations of the National Employment Service relating to work-seekers, vacancies notified, etc. and the Employment Market Information (EMI) Programme of the D.G.E.&T., Ministry of Labour, Government of India regarding the number of persons employed, as both these sets of data taken together have a close bearing on the labour market situation prevailing in our country.

8.3 The Employment Exchange statistics provide only a broad indication of the unemployment situation in the organised labour market. Before drawing any conclusions the following limitations of the Employment Exchange statistics as indicators of unemployment in the country must be kept in mind:-

(i) All persons registered with the Employment Exchanges are not necessarily unemployed. Quite a number of them are already in employment and have registered their names for better and more suitable jobs.

(ii) Registration being voluntary, all unemployed persons do not register themselves with the Employment Exchanges.

(iii) Some work-seekers registered at the Employment Exchanges who secure employment subsequently through sources other than the Exchanges do not get their names de-registered.

(iv) Many persons residing in rural areas also register themselves with Employment Exchanges, but as the Employment Exchanges are located in urban areas, the rural registrants are not likely to get properly represented in the live Register.

(v) Many students, who normally are not considered a part of the labour force, also register themselves for employment assistance primarily with a view to gaining seniority in registration.

(vi) Some work-seekers register their names with more than one Employment Exchange.

GENERAL LEVEL OF UNEMPLOYMENT

8.4 On the basis of the data available from the 50th Round of the NSS (1993-94), unemployment was estimated to be 11.53 million according to Usual Principal Status (UPS), 14.35 million according to Weekly Status (WS) and 6508 million person days according to Daily Status(DS). As a percentage of the Labour Force, unemployment according to the three concepts works out to 2.56, 4.28 and 6.03 respectively (Table 21). The unemployment rates are much higher for the urban, than for the rural areas, and for women than for men. For example, unemployment rate according to UPS was 5.21 percent for the urban and 1.79 percent for the rural areas, and 8.21% for females and 4.54 % for males in the urban areas. The unemployment rates in the rural area, according to UPS for male, is more than females i.e unemployment rate according to UPS was 1.96 percent for males and 1.40 percent for females

UPS-Usual Principal Status. A person is considered unemployed according to this concept if he/she was available for work but without work for a major part of the year.

WS- Weekly Status. A person is considered unemployed according to this concept if he/she though being available for work did not have work even for one hour during the reference week.

DS- Daily Status. It is a measure of unemployment in terms of person days of unemployment of all the persons in the Labour force during the reference week.

8.5 The absolute magnitude of unemployment has, of course, been increasing over the years; but open unemployment rates have also been rising in recent years. Unemployment rates according to UPS criterion decreased from 3.77 percent in 1987-88 to 2.56 percent in 1993-94 and according to WS from 4.80 percent to 4.28 percent. Unemployment rate by

daily status criterion has also shown a decline from 6.09 percent to 6.03 percent over this period. These trends suggest that while the total unemployed labour (in person days as measured by daily status concept) has shown a decline as a percentage of the Labour Force, the percentage of unemployed has increased. In other words, the structure of unemployment seems to be shifting from the predominance of underemployment towards rise in open unemployment.

8.6 Within the broad trends towards an increasingly open and chronic character of unemployment the following features may be considered of special significance. For one, this trend is seen to be particularly strong in the case of rural areas, where Usual Status unemployment has decreased from 3.07 percent of Labour Force in 1987-88 to 1.79 percent in 1993-94, and Daily Status unemployment has increased from 5.25 percent to 5.61 percent. In urban areas, only a small change in the open (usual status) unemployment rate was observed from 6.56 to 5.21, so also in the Daily Status unemployment rate from 9.26 to 7.43 percent. Secondly, the trend in the increased incidence of open unemployment was stronger in the case of women than men. The usual status rate of unemployment decreased from 3.52 in 1987-88 to 1.40 percent in 1993-94 among rural women workers but the decrease in the case of rural male workers was from 2.87 to 1.96 percent. In the urban areas also, the open unemployment rate decreased in the case of women and men. Thirdly, the differences between the usual status and daily status unemployment rates were almost same in the case of women and in the case of men, which implies that underemployment is in same proportion of overall unemployment in the case of women as in case of men.

8.7 The most comprehensive measure of incidence of the unemployment is the one based on the daily status concept, as it includes all the person days of unemployment of those openly unemployed as well as of the underemployed. According to this measure, the unemployment rate in the country during 1993-94 was 6.03% of the labour force as against 6.09% in 1987-88. The unemployment rates (DS), among the major states, was highest in Kerala during 1993-94; the rates were 14.7% and 17.7% in its rural and urban areas respectively, the corresponding all India rates being 5.6% and 7.4% in rural and urban areas respectively. In this state the rates among males and females were 13.1% and 19.0% in rural and 14.1% and 27.8% respectively, in urban areas. The states followed by Kerala were Tamil Nadu, West Bengal, Orissa and Andhra Pradesh, Uttar Pradesh had the lowest unemployment rate (3.1% and 4.8% in rural and urban areas respectively). Next lowest was in Madhya Pradesh, 2.6% and 6.8% in rural and urban areas respectively.

WORK-SEEKERS

8.8 The number of work-seekers on the Live Register of Employment Exchanges in the country has gone up from 270.34 lakh at the end of March, 1986 to 366.35 lakh at the end of March, 1995. The number of men and women on the Live Register of Employment Exchanges and the percentage changes over the years are presented in the following Table:-

It will be observed from the above Table-22 that there has been an increase in the number of job seekers registered with the Employment Exchanges over the years from 1986 to 1995. However, during the period under review (1994-95), the number of work-seekers registered with the Employment Exchanges has gone up from 360.39 lakh at the end of March, 1994 to 366.35 lakh at the end of March, 1995, recording an increase of 1.7%. In the case of male registrants there was an increase of 1.4%, whereas female registrants increased by 2.7% during the period under review. The number of work seekers at the end of March, 1994 and 1995 by States/U.Ts. is contained in Annexure.XI

DISTRIBUTION OF EDUCATED JOB-SEEKERS

8.9 All types of persons approaching Employment Exchanges for seeking employment assistance are registered by the Employment Exchanges in accordance with their educational qualifications and skills. Educated job-seekers i.e. those who are matriculates and above form a significant segment on the Live Register of Employment Exchanges. Providing employment to educated job seekers poses relatively a more intricate problem than to those in the uneducated category as educated people are generally desirous of seeking mostly white-collar jobs. The following Table 23 presents the number of educated job-seekers classified by sex and educational qualifications:

TABLE-23

DISTRIBUTION OF JOB-SEEKERS BY EDUCATIONAL LEVEL AND SEX AS ON 31ST DECEMBER 1992 & 1993

It will be seen from above data that as on 31.12.93 out of 3958.3 thousand graduate and post-graduate job seekers, 3479.1 thousand were graduate and 479.1 thousand post-graduate. As regards women work seekers, out of 1203.0 thousand graduate and post-graduate, 1018.9 thousand were graduate and the remaining 184.1 thousand were post-graduate. Faculty-wise analysis of graduate job-seekers reveals that 1376 thousand were degree holders in Arts, followed by 676 thousand in Science, 607 thousand in Commerce and 522 thousand in Education. The number of registrants holding degree in Engineering, Agriculture, Medicine and other faculties was much less as compared to registrants holding degrees in Arts, Science, Commerce and Education. Faculty-wise composition of women job-seekers reveals that the number of women job-seekers holding degrees in almost all the disciplines except science had gone up considerably during 1993. Out of 479 thousand post-graduate registrants, 237 thousand were post-graduates in Arts, 100 thousand in Science, 66 thousand in Commerce and 37 thousand in Education. The number of post-graduate job-seekers in the remaining faculties was less as compared to above faculties. Faculty-wise distribution of women post-graduate job-seekers reveals increase in favour of all the disciplines.

DISTRIBUTION OF JOB-SEEKERS BY ZONES/REGIONS

8.11 There were approximately 366 lakh work-seekers on the Live Register of Employment Exchanges as on 31st March, 1995. The total number of educated job seekers as on 31st Dec. 1993 was around 236 lakh.

8.12 The Zonal/Regional distribution of total work-seekers, as also educated work-seekers borne on the Live Register of Employment Exchanges, is shown in the following Table:

TABLE-25

Total:	36606.4	36010.5	1.7	23612.3	23001.5	2.7

Analysis of data contained in the above Table shows that during 1994-95 the total number of work-seekers registered highest increase of 7.7% in the Eastern Zone followed by Central Zone (5.3%), Western Zone (1.7%). However, their number recorded significant decrease in the North Eastern Zone (-7.7%), Southern Zone (1.9%) and Northern Zone (-0.5%). Among the stock of educated work seekers during 1992-93 the Southern Zone reflected highest increase (7.6%) followed by 3% in the North Eastern Zone. A decrease of 2.8% in the case of educated work seekers on Live Register in the Employment Exchanges of States in Central Zone is a special feature.

OCCUPATIONAL COMPOSITION OF JOB-SEEKERS

8.13 The distribution of job-seekers registered with Employment Exchanges as on 31st December, 1990 by broad occupational divisions is presented in the following Table.

TABLE-26

**NUMBER OF JOB-SEEKERS ON THE LIVE REGISTER OF
EMPLOYMENT EXCHANGES AS ON 31ST DECEMBER, 1990

It will be seen from the above classification of work-seekers according to broad Occupational categories that 82% of the job-seekers belonged to the fresher categories and therefore these workers are not classified by specific occupations. Of the total job-seekers 6.1% were

Production and Related Workers, Transport Equipment Operators and Labourers; 5.4% were Professional & Technical Workers; 4.6% Clerical and Sales workers; 1.5% Service Workers and 0.3% were Farmers, Fishermen, Hunters, Loggers and Related Workers.

LABOUR MARKET SITUATION

8.14 The registration of job-seekers, vacancies notified and placements effected as per Live Register of Employment Exchanges give an idea about the labour market situation in the country. The following Table contains data on registration of job-seekers, vacancies notified and persons placed in suitable employment through the Employment Exchanges:

TABLE-27

**REGISTRATIONS EFFECTED, VACANCIES NOTIFIED AND
PLACEMENTS MADE DURING 1986-1995 (JANUARY-DECEMBER)**

1994	59.27 (7.1)	3.96 (2.9)	2.05 (-11.3)	6.7	3.5
1995	58.58 (-1.2)	3.86 (-2.5)	2.15 (4.9)	6.6	3.7

Figures in brackets show percentage change over previous year.

Data in the preceding Table shows that about 58.6 lakh work-seekers got themselves registered with the Employment Exchanges in the year 1995. A continuing fall in the number of vacancies notified to the Employment Exchanges by various employers over the last ten years from 1986 to 1995 appear to be an alarming feature reflecting dis-popularity of their services in its placement activities. The number of registrants placed in suitable employment has also shown a declining trend year after year.

VACANCIES NOTIFIED AND CANCELLED BY BROAD OCCUPATIONS.

8.15 The following Table indicates data about the number of vacancies notified and cancelled for lack of suitable applicants by the Employment Exchanges during the calendar year 1990.

TABLE 28

OCCUPATIONAL DISTRIBUTION OF VACANCIES NOTIFIED & CANCELLED

(In Thousands)			
Occupational Division Code.	Brief Description	No. of vacancies notified and cancelled during 1990	Percentage to total
1	2	3	4
0-1	Professional & Technical workers(excluding Teachers)	148.5	30.3
2	Administrative& related Workers	1.5	0.3
3-4	Clerical & Sales Worker (excluding Typist)	110.1	22.4
5	Service Workers	49.3	10.1
7-8&9	Production and Related workers and transport equipment operators	148.0	30.1
6 & X	Others	33.5	6.8
Total:		490.9	100.0

It will be seen from the above data that out of 490.9 thousand vacancies notified to the Employment Exchanges, 148.5 thousand (30.3%) were meant for Professional & Technical workers 148.0 thousand (30.1%) for Production and Related Workers and Transport Equipment Operators, 110.1 thousand (22.4%) for Clerical and Sales Workers (excluding Typists), 49.3 thousand(10.1%) for Service Workers. Around (6.8%) 33 thousand vacancies belonged to other occupational categories.

VACANCIES OPEN TO FRESHERS

8.16 Though the job-seekers classified as freshers (say in-experienced or untrained) comprise a high proportion in the Live Registers of Employment Exchanges, not all vacancies notified to various Employment Exchanges and other recruitment agencies such as Staff Selection Commission, Railway Recruitment Board, Banking Services Recruitment Board, U.P.S.C., State-Public Service Commissions etc. are open to freshers (i.e. without work experience and training). The job opportunities in various fields of economic activity which are open to freshers, especially those having professional and technical qualifications and notified to the recruiting agencies mentioned above is another important aspect of the labour market situation.

8.17 Table-29 gives the total number of vacancies notified to the Employment Exchanges during 1990-91 by Faculty, those open to freshers (Degree and Diploma holders) and their percentage. These include not only the vacancies which were notified to the various Employment Exchanges in the country but also those falling under the jurisdictions of the U.P.S.C., State Public Service Commissions, Railway Service Commission and Subordinate Service Commission, etc.

It will be observed from the data contained in the above Table- 29 that the proportion of vacancies open to freshers decreased from 79.3% during 1990 to 67.5% during 1991.

Among the Faculties, the proportion of vacancies open to freshers to the total vacancies notified was the highest in Social Science (90.2%), followed by 'Natural Science(78.0%), Agriculture (63.4%), Technology (42.4%) ,Medicine (40.1%), and Engineering (19.2%).

JOB SEEKERS OF SPECIAL CATEGORIES

8.18 A large number of women, scheduled castes, scheduled tribes and physically handicapped persons are on the Live Register of Employment Exchanges, as may be seen from Table-30.

TABLE-30

4. Physically Handi- capped	352.7	340.3	3.6

Data in the above Table shows that the number of Physically handicapped job seekers in 1995 had gone up by 3.6% followed by Scheduled Tribes (2.3%) and Scheduled Castes (2.2%). The number of women job seekers has shown a marginal decline of 0.3% in 1995 over the year 1994.

SCHEDULED CASTE/SCHEDULED TRIBE JOB-SEEKERS

8.19 Scheduled Caste and Scheduled Tribe job-seekers form an important constituent of the Live Register of Employment Exchanges. The number of these job-seekers, classified by their educational levels is shown in the following Table .

It will be noticed from data in the above Table that at the end of June, 1993, there were 49.7 lakh Scheduled caste job-seekers and 13.3 lakh Scheduled tribe job-seekers on the Live Register of Employment Exchanges. The number of S.C. job-seekers recorded an increase of 3.6% and the number of S.T. job-seekers increased by 6.1% in 1993 over 1992. The large chunk of such work-seekers were below matriculates (including illiterates), followed by matriculates. The number of vacancies filled by Scheduled Caste & Scheduled Tribes declined by 18.2% & 14.2% respectively during 1993-94.

WOMEN WORK-SEEKERS

8.20 The information about registration and placement effected by the Employment Exchanges in respect of women work-seekers during the years 1986-1995 is given in the following Table.

TABLE-32

**NUMBER OF REGISTRATION AND PLACEMENT OF WOMEN EFFECTED
BY EMPLOYMENT EXCHANGES: 1986-95.**

Year	: Registrations : (000)	: Placements : (000)	: Percentage of : Placements to : Registrations.

1994	1316.5	42.1	3.2
1995	1376.0	43.6	3.2

It would be seen from above data that the percentage placement of women to the total female registrants during 1986-1995 was in the range of 3.2% to 5.4% . In fact the data in

the above table indicates almost a declining tendency in the number of women placements between 1986 and 1995. The only exception, however, was placement of women which recorded an increase of 5.1% in 1988 over 1987.

EDUCATED WOMEN WORK-SEEKERS

8.21 The following Table contains the number of registration and placement of educated women job-seekers.

An analysis of above data reveals an overall increase of 5.6% in the registration of women candidates in 1993 over 1992. In the case of registration of women graduates the decline of 23.6% appears to be a special feature. Percentages of Placement of women graduates & post-graduates and under-graduates to their respective registrations were 7.9% and 1.9% respectively during 1993.

MANPOWER SHORTAGES

8.22 One of the important features of the labour market operations remained that though there was an increase in the number of work seekers over the years, shortages of manpower in some categories in the labour market still continued to be reported. A number of vacancies remained unfilled in many of the establishments in the organised sector for want of suitable applicants. Quarter-wise number of such unfilled vacancies for different categories of workers under occupational divisions are indicated in the following Table .
