## Quarterly Bulletin on Employment and Unemployment Indicators

---

### 1. Introduction

#### 1.1 Periodic Labour Force Survey (PLFS) of NSO

1.1.1 Considering the importance of availability of labour force data at more frequent time intervals, National Statistical Office (NSO<sup>1</sup>) launched Periodic Labour Force Survey (PLFS) on April 2017. The first Annual Report<sup>2</sup> (July 2017- June 2018) covering both rural and urban areas giving estimates of all important parameters of employment and unemployment in both usual status (ps+ss) and current weekly status (CWS) was released on May 2019.

To measure the dynamics in labour force participation and employment status in the short time interval of three months, for the urban areas only, a Quarterly Bulletin is brought out giving estimates of labour force indicators, viz., Worker population ratio (WPR), Labour Force Participation Rate (LFPR), Unemployment Rate (UR), distribution of workers by broad status in employment and industry of work in the Current Weekly Status (CWS).

The first Quarterly Bulletin for the Quarter ending December 2018 was brought out in May 2019. This Bulletin for the Quarter ending March 2019 is the second in the series.

#### 1.2 Indicators presented in this Bulletin

1.2.1 In this Bulletin indicators of employment and unemployment in current weekly status (CWS) are presented for the urban areas separately for the periods April – June 2018, July – September 2018, October – December 2018 and January – March 2019.

<sup>1</sup> It may be noted that National Sample Survey Office (NSSO) is now an integrated single entity National Statistical Office (NSO).

<sup>2</sup> The 'Concepts and Definitions', 'Sample Design and Estimation Procedure' and Schedule on PLFS (Schedule 10.4) (first visit and revisit) may be pursued as Chapter Two, Appendix B and Appendix C, respectively in the Annual Report, PLFS: 2017-18, which is accessible at [www.mospi.gov.in](http://www.mospi.gov.in)

## 2. Key findings

### 2.1 Labour Force Participation Rates (LFPR) in current weekly status

2.1.1 Labour force refers to the part of the population which supplies or offers to supply labour for pursuing economic activities for the production of goods and services and, therefore, includes both ‘employed’ and ‘unemployed’ persons. Labour-force participation rate (LFPR) is defined as the percentage of population in the labour-force. Labour-force according to *current weekly status* (CWS) is the number of persons either employed or unemployed on an average in a week of 7 days preceding the date of survey. In Statement 1, LFPR in CWS are presented.

Statement 1: Labour force participation rate ( in per cent) in CWS in urban areas

## 2.2 Worker Population Ratio (WPR) in current weekly status

2.2.1 Worker Population Ratio (WPR) is defined as the percentage of workers in the population. The workforce measured in CWS gives the average picture of the workforce in a short period of one week during the survey period. The estimate of workforce in the CWS provides the number of persons worked for at least 1 hour on any day during the 7 days preceding the date of survey. In Statement 2, WPR in current weekly status are presented.

### 2.3 Distribution of workers in current weekly status by broad status in employment

2.3.1 The workers in current weekly status are classified into three broad categories according to their status in employment. These broad categories are: (i) *self-employed*, (ii) *regular wage/salaried employee* and (iii) *casual labour*. Within the category of *self-employed* two sub-categories have been made as follows: (i) *own account worker and employer* combined together and (ii) *unpaid helper in household enterprises*. In Statement 3, distribution of the workers of age 15 years and above in CWS by status in employment are presented.

## 2.4 Distribution of workers in current weekly status by broad industry of work

2.4.1 Three broad industries of work which have been considered here are agriculture sector (NIC-2008 codes 01-03), secondary sector (NIC-2008 codes 05-43), tertiary sector (NIC-2008 codes 45-99). Distribution of workers of age 15 years and above in CWS, in these three broad industries of work are in Statement 4.

## 2.5 Unemployment Rate (UR) in current weekly status

2.5.1 *Unemployment rate* (UR) is defined as the percentage of unemployed persons in the *labour force*. This rate indicates the residual of labour force. The estimates of unemployed in CWS gives an average picture of unemployment in a short period of 7 days during the survey period. According to the *current weekly status* (CWS) approach, a person was considered as unemployed in a week if he/she did not work even for 1 hour during the week but sought or was available for work at least for 1 hour during the week. In Statement 5, UR in CWS for the periods are presented.

### 3. Sample Size

**3.1 Sample Size in urban areas in each of the survey period April- June 2018, July- September 2018, October – December 2018 and January – March 2019:** In urban areas, a rotational panel sampling design was used and in this rotational panel scheme each selected household in urban areas is visited four times – one with first visit schedule and other three with revisit schedule. In the Table below, the sample size in terms of FSUs (UFS blocks), households and persons in urban areas is given, separately for each of the survey period April – June 2018, July – September 2018, October – December 2018 and January – March 2019. It may be noted that in each of these periods, besides the first visit sample (25 per cent of total sample size), samples in respect to three revisits (75 per cent of total sample size) were also surveyed.

Table : Sample size in urban areas in each of the Survey period April- June 2018, July- September 2018, October – December 2018 and January – March 2019
