## Quarterly Bulletin on Employment and Unemployment Indicators

---

### 1. Introduction

#### 1.1 Periodic Labour Force Survey (PLFS) of NSO

1.1.1 Considering the importance of availability of labour force data at more frequent time intervals, National Statistical Office (NSO) launched Periodic Labour Force Survey (PLFS) on April 2017. The first Annual Report (July 2017- June 2018) and second Annual Report<sup>1</sup> (July 2018- June 2019) of PLFS covering both rural and urban areas giving estimates of all important parameters of employment and unemployment in both usual status (ps+ss) and current weekly status (CWS) have already been released.

To measure the dynamics in labour force participation and employment status in the short time interval of three months, for the urban areas only, a Quarterly Bulletin is brought out giving estimates of labour force indicators, viz., Worker Population Ratio (WPR), Labour Force Participation Rate (LFPR), Unemployment Rate (UR), distribution of workers by broad status in employment and industry of work in the Current Weekly Status (CWS).

Four Quarterly Bulletins of PLFS corresponding to the quarters ending December 2018, March 2019, June 2019 and September 2019 have already been released. This Bulletin for the quarter ending December 2019 is the fifth in the series.

#### 1.2 Indicators presented in this Bulletin

1.2.1 In this Bulletin indicators of employment and unemployment in current weekly status (CWS) are presented for the urban areas separately for the periods:

- October – December 2018
- January – March 2019
- April – June 2019
- July – September 2019
- October – December 2019

---

<sup>1</sup> The 'Concepts and Definitions', 'Sample Design and Estimation Procedure' and Schedule on PLFS (Schedule 10.4) (first visit and revisit) may be pursued as Chapter Two, Appendix B and Appendix C, respectively in the Annual Report, PLFS: 2018-19, which is accessible at [www.mospi.gov.in](http://www.mospi.gov.in).

## 2. Key findings

### 2.1 Labour Force Participation Rates (LFPR) in current weekly status

2.1.1 Labour force refers to the part of the population which supplies or offers to supply labour for pursuing economic activities for the production of goods and services and therefore, includes both ‘employed’ and ‘unemployed’ persons. Labour Force Participation Rate (LFPR) is defined as the percentage of population in the labour force. Labour force according to *current weekly status* (CWS) is the number of persons either employed or unemployed on an average in a week of 7 days preceding the date of survey. In Statement 1, LFPR in CWS are presented.

## 2.2 Worker Population Ratio (WPR) in current weekly status

2.2.1 Worker Population Ratio (WPR) is defined as the percentage of workers in the population. The workforce measured in CWS gives the average picture of the workforce in a short period of one week during the survey period. The estimate of workforce in the CWS provides the number of persons worked for at least 1 hour on any day during the 7 days preceding the date of survey. In Statement 2, WPR in current weekly status are presented.

## 2.3 Distribution of workers in current weekly status by broad status in employment

2.3.1 The workers in current weekly status are classified into three broad categories according to their status in employment. These broad categories are: (i) *self-employed*, (ii) *regular wage/salaried employee* and (iii) *casual labour*. Within the category of *self-employed* two sub-categories have been made as follows: (i) *own account worker and employer* combined together and (ii) *unpaid helper in household enterprises*. In Statement 3, distribution of the workers of age 15 years and above in CWS by status in employment are presented.

## 2.5 Unemployment Rate (UR) in current weekly status

2.5.1 *Unemployment rate* (UR) is defined as the percentage of unemployed persons in the *labour force*. The estimates of unemployed in CWS give an average picture of unemployment in a short period of 7 days during the survey period. According to the *current weekly status* (CWS) approach, a person was considered as unemployed in a week if he/she did not work even for 1 hour on any day during the reference week but sought or was available for work at least for 1 hour on any day during the reference week. In Statement 5, UR in CWS for the periods are presented.

### 3. Sample Size

**3.1 Sample Size in urban areas in each of the survey period October – December 2018, January – March 2019, April – June 2019, July- September 2019 and October – December 2019:** In urban areas, a rotational panel sampling design was used and in this rotational panel scheme each selected household in urban areas is visited four times – one with first visit schedule and other three with revisit schedule. In the Table below, the sample size in terms of FSUs (UFS blocks), households and persons in urban areas are given, separately for each of the survey period October – December 2018, January – March 2019, April – June 2019, July – September 2019 and October – December 2019. It may be noted that in each of these periods, besides the first visit sample (25 per cent of total sample size), samples in respect to three revisits (75 per cent of total sample size) were also surveyed.
