Report on the Sixth Round of Quarterly Employment Survey

(Under the All-India Quarterly Establishment-based Employment Survey)

Government of India Ministry of Labour& Employment Labour Bureau

Foreword

This report is the sixth consecutive quarterly employment assessment across nine selected non-

farm sectors of the Indian economy. With the objective of providing robust and reliable data on

labour market parameters at a high frequency, the present report elaborates information on

employment as on 1st July 2022 at the all-India level. The survey covers vital parameters and

characteristics including sector-wise and gender-wise employment, number of workers across

establishments, extent of registration under various labour acts, estimated workers by category

like self-employed, regular, contractual, casual, etc.

This report covers an expanded sample size of about 15,000 units selected across the country.

Further, the sample frame of the present report has also seen partially amplified as compared to

the first phase of Quarterly Employment Survey (i.e. first four reports from April, 2021 to March,

2022). Previously, the entire sample was drawn from the 6th Economic Census frame. In the

current report, the list of establishments covered under Annual Survey of Industries (ASI) 2019-

20 for manufacturing sector and the list of units of Govt. Hospitals/ Dispensaries/ Health Centres

as provided by the Ministry of Health and Family Welfare (MoH&FW) in case of Public Health

sector were used to augment the list frame for drawing the sample. These improvements in the

sampling frame are expected to ensure improvements in the estimates.

This report is the outcome of unceasing efforts made by the Expert Group under the

Chairmanship of Prof. S P Mukherjee. I express my gratitude to the Expert Group for support,

guidance and valuable suggestions. I am also grateful to the Ministry of Labour and

Employment for entrusting the responsibility of conducting the Quarterly Employment Survey to

Labour Bureau and guidance provided.

I am thankful to the units/ establishments for providing useful information on employment and

extending cooperation to our field officers.

I am confident that this report will be helpful to stakeholders for formulating effective labour

market policies. I look forward to your valuable suggestions/ comments to enrich the report in

subsequent quarter.

(Alok Chandra)

Chapter 1

Introduction

1. Growth and Employment:

- 1.1 India stands at the threshold of transforming its potential to long-term sustainable growth via quality employment opportunities and working conditions. In its 75th year of Independence, India became the world's fifth largest economy. The growth story of the Indian economy is the saga of its domestic reliance and resilience. In the very near future, the rewards of demographic dividend are bound to come to fruition. Gainful employment generation is the bedrock for attaining growth with equity thereby translating into prosperity for the population as a whole.
- 1.2 Structural transformation of the labour market from agriculture to sectors where productivity (output per worker) and average incomes are higher, particularly IT/BPOs, Health, Financial Services and modern services; is underway. The Government of India's initiatives including 'Make in India', "Start-up India", Deen Dayal Upadhyaya Grameen Kaushalya Yojana (DDU-GKY), Prime Minister Employment Generation Programme (PMEGP), etc.; are significant steps towards achieving employment intensive growth, which is broad-based.
- 1.3 Therefore, availability of statistics regarding sector wise employment trends at regular intervals is of utmost importance to monitor the employment situation, and to devise, execute and evaluate policies for human resource development including skill development, employment creation and income generation. The frequency of employment data becomes even more crucial in the wake of the growing exposure of India to the global economic upheavals and its consequent impact on the employment scenario within the country.
- 1.4 While household based employment surveys [including Periodic Labour Force Survey (PLFS) conducted by Ministry of Statistics and Programme Implementation (MOSPI)] provide the supply-side analysis of labour market, the Quarterly Employment Survey(QES) conducted by Labour Bureau brings out an estimate of the demand side of labour market by surveying establishments in the selected sectors of the economy. In view of the significance of data generated by the QES, the revised Quarterly Establishment based Employment Survey (QES) was launched w.e.f. April, 2021. The present report is

the sixth in the series of revised quarterly reports by covering establishments with at least 10 workers.

2. Scope and Coverage of QES

- 2.1 The scope of the present QES is limited to establishments having 10 or more workers (commonly denoted as organized segment). The scope & coverage of QES is focused on employment in non-farm economy covering nine sectors viz. Manufacturing, Construction, Trade, Transport, Education, Health, Accommodation & Restaurants, IT/BPOs and Financial Services. These aforesaid nine sectors account for around 85% of the total employment in units with 10 or more workers as per the 6th Economic Census Report (2013-14).
- 2.2 The sampling frame or list of establishments for the present QES have been derived from the 6th Economic Census as well as additional sources like Annual Survey of Industries (2019-20) latest frame list and updated frame in case of Health Sector Establishments in Public Sector from Ministry of Health & Family Welfare. Economic Censuses (EC) are establishment-based surveys and conducted by Ministry of Statistics & Programme Implementation (MoSPI). ECs have been conducted in the years 1977, 1980, 1990, 1998, 2005, 2013-14 and 2020. Results of the 7th EC (2020) are yet to be made public by MOSPI. The 6th EC is the latest available frame of all Non-Agricultural establishments, i.e., excluding those establishments belonging to Crop Production, Plantation, Public Administration, Defence and Compulsory Social Security. As per the 6th EC (2013- 14), 58.5 million establishments were found to be in operation employing 131.29 million persons. Out of these 58.5 million establishments, only 8 lakhs i.e.1.4% establishments were in the organized segment (establishments employing 10 or more workers). For the purpose of sampling, we need to have name and addresses of all the 58.5 million establishments (including household establishments operating within households or outside in fixed structures or otherwise) covered in the 6th EC. Unfortunately, these are not readily available in the frame. However, a Directory of Establishments with 10 or more workers (sometimes referred to as establishments in the 'organized' segment) with names, addresses and numbers of workers as also types of economic activities carried out (with corresponding codes in National Industrial Classification or NIC) is available and that is all which can be used as a sampling frame.

2.3 In view of the aforementioned limitations, and due to the dated nature of the Economic Census, it was decided to augment the sampling frame from various sources in order to have up-to-date frame for the conduct of QES. The same is explained in the following section.

3. Present Quarterly Employment Survey

- 3.1 It started in April, 2021 to achieve the following objectives viz.
 - i) Providing quarterly employment estimates for nine selected sectors of the economy viz. Manufacturing, Construction, Trade, Transport, Education, Health, Accommodation & Restaurants, IT/BPOs and Financial Services.
 - ii) Providing relative change in employment situation over the previous quarters in the above 9 sectors.
- 3.2 The survey has been re-designed in terms of increase in sample size as well as updation of the frame list, sampling design and modifications in the schedule are from the 5th round and onwards. This was followed in the 6th Round of QES, covering the period 1st July 2022 to 30th September 2022. About 15,000 units as compared to 12038 units covered during the first four quarters April, 2021 to March, 2022 were selected on quarterly basis, which is about 3% of the sampling frame (total establishments as per frame list). The updated list of establishments covered under Annual Survey of Industries (ASI) 2019-20 for manufacturing and the list of units of Govt. sector Hospitals/Dispensaries/Health Centres as provided by Ministry of Health and Family Welfare (MoHFW) in case of Public Health sector were utilised to augment the list frame for establishments having 10 or more workers for improved coverage.
- 3.3 For selecting a fixed panel of 15000 units, a stratified random sampling (Without Replacement) design considering strata delineated in terms of State /Union Territory, Sector (type of economic activity) and size—class (number of workers) was adopted. Each of the nine sectors, within a State/UT, was further divided into six size classes based on the size of employment. Accordingly, number of units were selected proportionately (proportional allocation) to the number of units in the population (frame) in the respective strata viz. State by Sector by Size Class by using Simple Random Sampling (Without Replacement). Allotment of minimum of 10 sample units, at a sector level in each state (i.e., State X Sector), was ensured, further ensuring the proportional representation in each size class. Thus, the stratum/segment for the present sample design is State X

Sector X Size Class. Accordingly, units were selected based on proportional allocation using simple random sampling (without replacement).

3.4 The sampling design and estimation procedure used in the survey are given in Annexure-II of the Report. The schedule for QES collects information on identification, establishment particulars, employment with break-up of characteristics such as gender, category of workers, skill development programme conducted, on-the-job training provided by establishments and also provision of social security benefits, etc. QES schedule has been attached at Annexure-IV of the Report.

4. Key Points

- 4.1 The sector-wise estimates of employment captured under QES along with information on parameters such as category and gender of workers, skill development training programmes, etc. are highly useful inputs from policy perspective. Therefore, QES data will be found useful by policy-makers, Central/State Governments, research scholars and other stakeholders. While using the estimates of QES, the following points have to be kept in mind.
 - i. The survey work for the sixth quarter of QES corresponds to the period 1st July to 30th September, 2022.
 - ii. The survey is based on responses of the establishments on voluntary basis.
 - iii. If an individual works in more than one establishment on reference date, the worker has been counted separately for each establishment.
 - iv. Percentages shown in the 'Total' row of the tables include those few sample establishments which were found to belong to sectors other than the nine selected ones during actual survey. This applies to all the tables presented in the Chapter-II of the report.

5. Highlights of the 6th round of QES

➤ The estimated total employment in the nine selected sectors stood at 3.21 crore (3,21,35,573) in the sixth round of QES; increasing by 2.82 lakh in comparison to the fifth round of QES (3,18,53,550).

(Table 2.1)

➤ Of the total estimated employment in the selected sectors, Manufacturing accounted for 43.39%, followed by Education at 16.59%, IT/BPOs at 11.61% and Health at 10.99%.

(Table 2.1)

➤ Almost 90% of the total 4.62 lakh estimated establishments have been found to be operating with less than 100 workers. Remaining 10% establishments were functioning with 100 or more workers. Financial Services and Education sector had the highest percentage of establishments operating with 100 or less workers.

(Table 2.8)

Around 53% of the establishments surveyed were enterprise by themselves.

(Table 2.2)

➤ About 97% establishments were located outside the household.

(Table 2.3)

➤ Of the total establishments surveyed, 91.40% were found to be registered under one or the other Acts. About 55% establishments were registered under the Goods and Services Tax Act, 2017. This was followed by the Factories Act, 1948 (27.67%) and the Companies Act, 1956 at about 24.63%.

(Table 2.10)

Majority establishments, almost 96% each in Manufacturing and IT/BPOs sectors, were registered under Good and Services Tax Act, 2017. About 74% establishments in Health sector were registered under the Clinical Establishments Act, 2010.

(Table 2.10)

- About 96% of the establishments covered were found to be operating perennially.
 (Table 2.4)
- > 27.75 % of the establishments were found to be Government/ PSU/ Autonomous body by their ownership type; followed by Private Limited Company (22.26%).

(Table 2.5)

➤ 22.4% of the total establishments surveyed were registered under the MSME Development Act, 2006; and about 90% of these were registered via Udyam portal.

(Table 2.6)

➤ About 5% of the establishments surveyed reported having expansion plans during the next one year; with the main preference of expansion in terms of workforce.

(Table 2.7)

About 76% of workers in establishments were engaged as Regular employees. This was followed by contractual employees at 18.44% at overall level.

(Table 2.14)

Maximum percentage of regular employees were employed in IT/BPO sector whereas highest percentage of contractual employees was found in manufacturing sector.

(Table 2.14)

Of the total estimated workers across all nine selected sectors, about 70% were male and remaining female workers.

(Table 2.13)

About 46% of the total workers were estimated in establishments with an employment size of more than 500 workers, whereas lowest number of workers were estimated in employment size of less than 10 establishments (1.32%).

(Table 2.9)

Majority of women workers were working in the Health and Education sectors. Male workforce was in majority in the Construction and Transport sectors.

(Table 2.13)

Establishments falling in IT/BPO sector were widely providing on-the-job training (almost 76%). The second place was taken by Health sector at 42.77%.

(Table 2.17)

➤ Most of the establishments (83.36%) covered in the survey, across all nine sectors, provided annual increments in salary/wages of their employees.

(Table 2.11)

➤ More than 50% of all establishments surveyed provided health facility for their workers and their family members. The second highest benefit provided was subsidized food/canteen (27.66%) closely followed by accommodation and restaurant sector (27.07%)

(Table 2.12)

About 91% workers were receiving benefits under the Employees Provident and Miscellaneous Provisions Act, 1952. This was followed by Payment of Gratuity Act, 1972 at about 74% and Employees State Insurance Act, 1948 at 70.63%.

(Table 2.16)

Chapter 2

Key findings of the Survey

1. Overview

- 2.1 In the 6th round of Quarterly Employment Survey (QES), the information was collected from 10,870 establishments spread across various sectors. The key findings of the survey have been presented in different tables discussed in this report. The sector wise details of the sample size as well as the estimates of establishments and workers across all the nine selected sectors are presented in Table 2.1. Further tables present the distribution of 'establishments' by different characteristics.
- 2.2 In the 6th QES report, 10,870 establishments were surveyed and the total estimated number of establishments came out to be 4.62 lakh establishments employing 3.21 crore workers. A highest number of units surveyed were from the Manufacturing sector (4892) followed by Education (1568) and Trade (1337).
- 2.3 From the estimated number of establishments, Education sector has the highest share of establishments with 1.66 lakh, followed by Manufacturing at 1.45 lakh establishments. In case of IT/BPOs sector, estimated number of establishments was found to be 2085 which is lowest as compared to other sectors under study. While three sectors, namely Manufacturing, Education and Financial Services form more than 75% of total estimated establishments; their share of total estimated workers is about 64%.
- 2.4 In case of estimated number of workers, Manufacturing sector showed the maximum strength at 1.39 crore workers. This was followed by Education sector at 53.32 lakh workers and IT/BPOs sector at 37.32 lakh workers. These three sectors accounted for more than 70% of all estimated workers in the 6th round of QES.
- 2.5 As discussed above, a total of 10870 establishments have been actually surveyed from different sectors in the 6th round of QES. A total of 56 establishments have reported change of sector as compared to the sampling frame. The sector wise sample establishments covered and estimated number of establishments & workers are presented in Table 2.1.

Tabl	Table 2.1: Sector wise Sample Size, Estimated Numbers of Establishments and Workers								
SI.	Sector	Sample	Estimated n	umber of	Percentage distribution of				
No.		Establishments	Establishments	Workers	Establishments	Workers			
		Surveyed			(%)	(%)			
(1)	(2)	(3)	(4)	(5)	(6)	(7)			
1	Manufacturing	4892	1,45,176	1,39,44,718	31.42	43.39			
2	Construction	221	2,896	4,91,688	0.63	1.53			
3	Trade	1337	40,619	17,74,359	8.79	5.52			
4	Transport	538	10,417	11,98,550	2.25	3.73			
5	Education	1568	1,66,448	53,32,001	36.02	16.59			
6	Health	483	24,650	35,31,113	5.33	10.99			
7	Accommodation & Restaurants	890	22,101	7,99,594	4.78	2.49			
8	IT/ BPOs	291	2,085	37,32,495	0.45	11.61			
9	Financial Services	594	45,262	12,63,040	9.80	3.93			
Total		10870	462054	32135574	100	100			

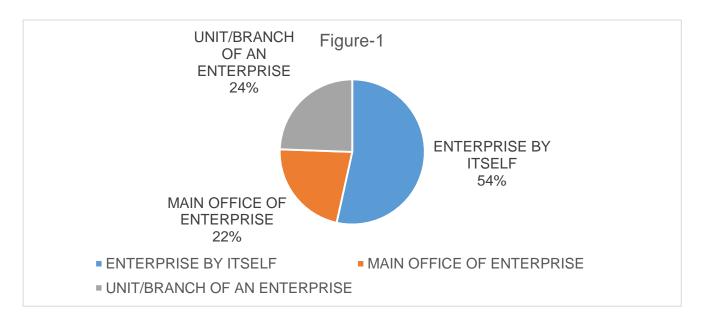

2.6 It is also interesting to note that IT/BPOs sector showed an estimate of 37.32 lakh workers although only 2085 estimated number of establishments were covered in this sector at all India level. IT/BPOs sector is known to engage sizeable workforce. The lowest number of workers has been estimated in Construction sector with only 4.91 lakh workers. Education and Health sectors have seen a positive jump with the engaging of 53.32 lakh workers and 35.31 lakh workers in the 6th round of QES in comparison to 52.64 lakh workers and 34.89 lakh workers respectively, in 5th round of QES.

2. Characteristics of Establishments

2.7 This section elaborates on the various aspects of establishments covered in the survey across all the nine selected sectors. The features encompass the status of establishments (enterprise by itself/ main office of an enterprise/ unit or branch of an enterprise); location of establishment (within or outside household); usual nature of operation of establishments (perennial, seasonal, casual); ownership type of establishment (Government/PSU/Autonomous Body, Proprietary, Partnership, Pvt. Ltd. Company, etc.); status of registration with MSMED Act, 2006; any future expansion plans of establishments, etc. have been covered under the section.

Distribution of Establishments by Status

2.8 The surveyed establishments were segregated by three different status viz., whether the establishment itself is an Enterprise or whether it is the main office of an Enterprise or it is a unit/branch office of an Enterprise. Table 2.2 below shows the percentage distribution of establishments by their Status. It is observed that more than 50% establishments were Enterprise by themselves. About 24% establishments were unit/branch of an enterprise and about 22% were the main office of an enterprise. Figure-1 may be viewed for an overall reference. Majority of the establishments in Manufacturing, Construction, Trade, Education, Health and Accommodations & Restaurants sectors were an Enterprise by themselves.

2.9 Further, at sectoral level, it may be seen that a major portion of the establishments from all the sectors were Enterprise by themselves. On the other hand, branches of an Enterprise constituted relatively a small percentage for all the sectors, except Transport and Financial Services sectors for which it was 43.73% and 51.37% respectively. While IT/BPO sector had the minimum percentage of establishments which were Enterprise by themselves; Financial services sector had the minimum percentage of establishments falling in main office of an enterprise and Construction sector had the lowest percentage of establishments which were unit/branch of an enterprise.

SI.	Sectors	An Enterprise	Main office	Unit/ Branch of	Total
No.		by itself	of an	an enterprise	
			enterprise		
(1)	(2)	(3)	(4)	(5)	(6)
1	Manufacturing	55.00	28.20	16.80	100
2	Construction	51.13	38.38	10.48	100
3	Trade	54.83	21.09	24.08	100
4	Transport	38.87	17.39	43.73	100
5	Education	55.55	20.62	23.83	100
6	Health	51.36	19.50	29.14	100
7	Accommodation & Restaurants	68.75	19.68	11.57	100
8	IT/ BPOs	34.82	29.40	35.78	100
9	Financial Services	37.54	11.09	51.37	100
	Total	53.56	22.06	24.38	100

2.10 The percentage distribution of establishments by their status have further been analysed based on the size class of workers in various establishments. The size class of the establishments have been segregated into six classes as mentioned in the below table. Table 2.2A presents the distribution of various size-classes of workers across establishments by their status.

	Table 2.2A: Percentage Distribution of Establishments by their Status for each size class of Workers							
SI. No.	Worker size class	An Enterprise by itself	Main Office of an enterprise	Unit/ Branch of an enterprise				
(1)	(2)	(3)	(4)	(5)				
1	< 10	57.31	17.23	25.47				
2	10 – 39	56.86	20.35	22.79				
3	40 – 99	51.03	26.46	22.51				
4	100 – 199	34.49	34.45	31.06				
5	200 – 499	29.86	33.10	37.05				
6	>= 500	27.59	31.39	41.02				
	Total	53.56	22.06	24.38				

2.11 It is observed from Table 2.2A that majority of smaller establishments (employing less than 10 and 10-39 workers class) were enterprises by themselves. On the other hand, about 28% of large establishments (employing 500 or more workers) were an enterprise by themselves. In case of Unit/Branch of an enterprise, the maximum share is for large establishments employing 500 or more workers, i.e., about 41%. These observations from the field show that large establishments having a large worker base tend to have more number of branches spread across the country. Further, small establishments, employing 10-39 workers too have 20.35% share in main office of an enterprise and 22.79% share in unit/branch of an enterprise.

Distribution of Establishments by Location

2.12 Table 2.3 presents the percentage distribution of establishments by their location; across the nine selected sectors in the survey. The objective was to know whether the establishment is located within household or outside household; and if outside household, how many establishments have a fixed structure and how many are operating without a fixed structure. The data shows that 96.94% establishments were located outside the household and almost all were operating in a fixed structure. Further, about 3% establishments were located within household. About 20% of Financial Services sector establishments were operating within household. In Manufacturing, Trade, Transport, Education, Health, Accommodations& Restaurants and IT/BPOs sectors; the share of establishments located outside households surpassed 96% for each sector.

Table 2	Table 2.3: Sector-wise Percentage Distribution of Establishments according to								
Locatio	n								
SI. No.	Sectors	Within household	d Outside household (%)						
		(%)	With fixed	Without fixed					
			Structure (%)	Structure (%)					
(1)	(2)	(3)	(4)	(5)					
1	Manufacturing	1.40	98.13	0.47					
2	Construction	5.55 84.35		10.10					
3	Trade	2.07	96.66	1.26					
4	Transport	0.95	99.05	0.00					
5	Education	0.46	99.54	0.00					
6	Health	1.08	98.92	0.00					
7	Accommodation & Restaurants	1.02	98.81	0.17					
8	IT/ BPOs	0.55	99.45	0.00					
9	Financial Services	20.03	75.10	4.87					
	Total	3.07	96.10	0.84					

Distribution of Establishments by Operation

2.13 The other important characteristics collected and compiled are the operation of the establishments. Table 2.4 reveals the percentage distribution of establishments by their usual nature of operation, i.e., whether establishments operated perennially, seasonally or casually. The combined status of all nine sectors shows that 95.60% were operating perennially, i.e. almost throughout the year. Remaining 4% establishments had seasonal nature of operation and less than 1% establishments were operating casually. Manufacturing and Construction sectors had the highest comparative percentage of establishments operating seasonally; 10.25% and 9.71% respectively. Financial services sector and IT/BPO sector have 99.90% and 99.74% of establishments operating perennially respectively.

	2.4: Sector-wise Peration	ercentage Distribu	tion of Establishment	s According to Nature			
SI.	Sectors	Percentage distribution of establishments by					
No.		Perennial (%)	Seasonal (%)	Casual (%)			
(1)	(2)	(3)	(4)	(5)			
1	Manufacturing	89.51	10.25	0.25			
2	Construction	88.36	9.71	1.93			
3	Trade	97.12	2.62	0.26			
4	Transport	90.94	8.33	0.73			
5	Education	99.32	0.68	0.00			
6	Health	97.61	2.39	-			
7	Accommodation & Restaurants	96.65	3.02	0.33			
8	IT /BPOs	99.74	0.26	0.00			
9	Financial Services	99.90	0.10	0.00			
	Total	95.60	4.26	0.15			

Distribution of Establishments by Ownership

2.14 The various ownership types covered in the survey includes: Government/PSU/Autonomous body, Proprietary (Male), Proprietary (female), Proprietary (transgender), Partnership, Pvt. Ltd. Company, Co-operative Society, Non-Profit Institution/ Trust, Other including SHGs. At the aggregate level, Government/PSU/Autonomous body ownership type had the highest percentage of establishments by 27.75%. This was followed by Private Limited Company at 22.26% and Proprietary (Male) at 18.11%. Further, Proprietary (Female) ownership percentage is 2.37%. The sector wise details of the establishments by ownership codes are given below in Table 2.5.

Distribution of Proprietary Establishments Owned by Female

2.15 The information regarding the ownership has been collected gender wise for proprietary type of establishments. Accordingly, the information has been compiled for female category to ascertain the extent of establishments owned by female. The below table provides the percentage of establishments owned by female. At aggregate level, 11.54% of the estimated establishments have reported owned by female. Majority of female owned establishments are in Health sector (25.58%) followed by Education sector (18.90%). The lowest percentages of female proprietary establishments were found in Transport sector (3.86%).

Distribution of Establishments Registered under MSME Development Act, 2006/ Udyam Portal

2.16 This section presents the percentage distribution of establishments registered under MSME Development Act, 2006/ Udyam Portal across all establishments in the selected sectors. About 22% of establishments were registered under the MSME Development Act, 2006. Out of these establishments, more than 90% of them were registered through Udyam Portal. It was observed that manufacturing sector had the largest share of establishments registered under MSME Development Act, 2006. Less than 1% of establishments in the Education sector were registered under MSMED Act, 2006. The sector wise details are given below in Table 2.6.

Table 2.6: Sector-wise Percentage Distribution of Establishments by registration under MSMED Act and Udyam Portal

	Total	22.40	90.55

Note: Registration under Udyam Portal only for those establishments who registered under MSME Act, 2006.

Distribution of Establishments with Expansion Plan

2.17 The survey collected information regarding future expansion plans of the establishments in the year following the survey. The establishments were asked whether they have any expansion plans, and if so, whether it is by creating additional branches, adding additional workforce or additional capital expenditure. Establishments planning to expand could even have a multi-pronged approach of expansion all three aspects. The Table 2.7 below presents the percentage of units reported expansion plans and mode of expansion.

Table	Table 2.7: Sector wise Percentage of Estimated Establishments with Expansion Plan

9	Financial Services	6.52	51.57	95.47	85.58			
Total 4.72			48.94	87.01	85.28			

2.18 The overall picture, as in Table 2.7, shows that 4.72% of estimated establishments reported expansion plans. Among establishments reported expansion plan, about 87% planned to add up workforce and another 85% planned to increase capital expenditure. About 49% of the establishments planned to create additional branches. Based on the survey results, it is observed that establishments in construction sector which have reported expansion plan, all were planning to expand, through increase in their workforce (100%) and raise capital expenditure (100%). The Manufacturing and Financial services sector had the maximum percentage of establishments with expansion plans. While in manufacturing, majority plan to increase their capital expenditure (91.78%), in financial services sector majority plan to add additional workforce (95.47%).

Table 2.7 (A) below presents sector wise percentage of establishment reported expansion plan according to size class of employment. The overall picture as shown in Table 2.7(A) reveals that the maximum expansion was reported as 8.51% under the size class 100-199 followed by 6.45% under the size class 500 & more workers. Sector-wise picture reveals that financial sector reported maximum expansion in the size class of employment having the size class of

100-199 whereas health sector reported highest expansion plan in the size class of 200-499 workers. The overall highest expansion was reported under manufacturing sector with 6.70% followed by financial services sector with 6.52%.

Table 2.7 (B) below presents sector wise percentage of establishments reported future plan of opening additional branches according to size class of employment. The overall picture as shown in Table 2.7(B) reveals that the maximum expansion was reported as 83.02 % under the size class 200-499 workers followed by 57.40 % under the size class 40-99 workers. Sector-wise picture reveals that establishments pertaining to Construction, Transport, Health and IT-BPO sector have reported 100 % future plan of expansion through opening of additional branches in the size class of 100 to 199 workers. The overall expansion in respect of additional branches was reported under trade sector with 69.07 % followed by accommodation & Restaurants sector with 59.90 %.

Table 2.7 (C) below presents sector wise percentage of establishments reported additional workforce according to size class of employment. The overall picture as shown in Table 2.7(C) depicts that the maximum expansion was reported as 91.43% under the size class 200-499 followed by 89.39% under the size class 10-39 workers. Sector-wise picture reveals that establishments pertaining to all sectors except manufacturing, education and health have 100 % future plan of expansion through engaging additional workforce in size class of 100 to 199 workers. The overall expansion in respect of additional workforce was reported under construction sector with 100 % followed by financial services sector with 95.47 %.

Table 2.7 (D) highlights sector wise percentage of establishments reported investment of additional capital expenditure according to size class of employment. The figures as shown in Table 2.7(D) depicts that the maximum expansion was reported as 94.78% under the size class 40-99 followed by 88.67 % under the size class 100-199. Sector-wise picture reveals that establishments pertaining to transport and construction sectors have 100 % future plan of expansion through investing additional capital expenditure in all size class of employment. The overall expansion in respect of investing additional capital expenditure was reported under construction sector with 100 % followed by manufacturing sector with 91.78 %.

The Sector wise percentage distribution of establishment reported expansion plan by ownership type is shown in the above Table No. 2.7 (E). At the overall level for all nine sectors, it is revealed that, Pvt. Ltd. Company ownership type has the highest percentage of 34.97 % followed by Proprietary (male) at 15.83% and Non-Profit Institution/Trust ownership type at 14.40%. At sectoral level, the highest percentage for Pvt. Ltd. Company ownership type was reported as 85.24 % in the IT/BPOs sector followed by transport sector at 81.42 %.

Distribution of Estimated Establishments by Size Classes

Table 2.8 provides the percentage distribution of the estimated establishments over the six size classes of employment for different sectors. About, 61.41% of the establishments are found to be concentrated in the size class with 10-39 workers, while 14.51% and 14.06% were in the size class of less than 10 workers and 40-99 workers respectively. A marginal number of establishments have been found in the size class of 200-499 workers and more than 500 worker's category.

	Table 2.8: Sector-wise Percentage Distribution of Establishments according to Employment Size

Distribution of Estimated Employment Share according to Different Size Classes

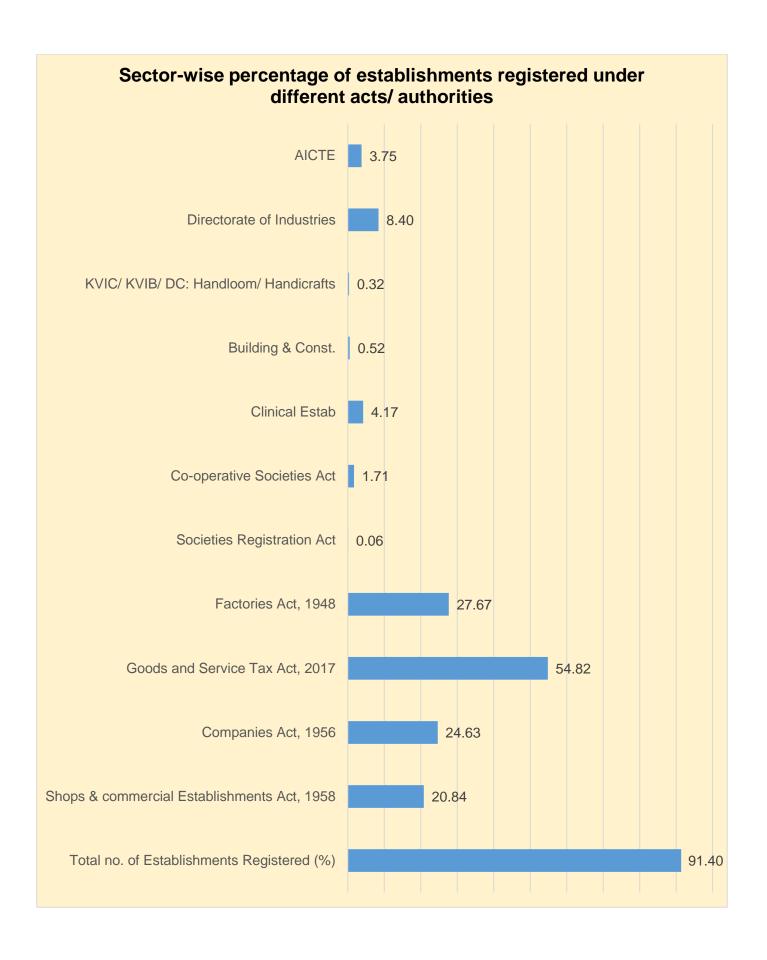

2.20 The following Table 2.9 presents the percentage distribution of total number of workers over the six size classes of employment in the nine selected sectors. It may be seen that highest 45.79% of the workers were concentrated in size class of 500 or more workers followed by 16.53% workers in the size class of 10-39 workers. The size class of less than 10 workers is holding the lowest share i.e. 1.32% of the total workers.

	Table 2.9: Sector-wise Percentage of Estimated Total Number of Workers according to Size Class of Employment

	Total	1.32	16.53	12.56	8.96	14.83	45.79						

2.21 At the sectoral level, 96.25% of the workers of IT/BPO were recorded from the size class of 500 or more workers. The lowest share of workers in the size class of 500 & more was reported in the education sector with 13.03%. In case of 10-39 workers' category, Education sector has the highest number of workers reported with 44.20% followed by 40.83% in the Financial Services sector.

Distribution of Establishments Registered under Different Acts

2.22 The information regarding the registration under various acts of the Government has also been collected from the surveyed establishments. Table 2.10 shows the percentage distribution of establishments according to the acts /authorities of their registration for the nine selected sectors. It may be noted that an establishment may be registered under a single or multiple Acts/Authorities simultaneously. As such, the row totals may add up to more than 100.

	Total	91.40	20.84	24.63	54.82	27.67	0.06	1.71	4.17	0.52	0.32	8.40	3.75	34.87

2.23 From the Table 2.10, it is observed that 91.40% of the establishments were registered under one or the other Act/ legislation. About 55% of the establishments were registered under the Goods and Services Tax Act, 2017. Further, 27.67% establishments were registered under the Factories Act, 1948; 24.63% were registered under the Companies Act, 1956; and 20.84% were registered under the Shops & Commercial Establishments Act, 1958. About 35% establishments were registered under the 'Other Agencies'.

2.24 At the sector level, highest percentage of establishments which were registered under one or more Acts were from manufacturing sector (99.15%), followed by IT/BPOs (98.64%) and Health (97.71%). Majority establishments under Accommodation& Restaurants were registered under the Goods and Service Tax Act, 2017 and Shops & Commercial Establishments Act, 1958. Most of the IT/BPO sector units were registered under Goods and Service Tax Act, 2017 and Companies Act, 1956. The coverage of units under Goods and services Act, 2017 was highest in Manufacturing and IT/BPO sectors. Most of the manufacturing sector units were also registered under Factories Act, 1948. Under Clinical Establishments Act, 2010, Health sector units had the maximum registration. Building and Other Construction Workers Act, 1996 saw maximum registration from Construction sector establishments. KVIC/KVIB/DC: Handlooms and Handicrafts have most of establishments from manufacturing sector registered.

Distribution of Establishments paying Increments in Salaries/Wages

2.25 An attempt has been made to get information on the benefits in terms of increments, subsidized items etc. provided to the workers by the establishments. All the surveyed establishments have been asked to provide information on the extent of increments provided to workers by the establishments. Table2.11 presented below can be seen for reference. These increments may be provided quarterly, half-yearly, annually, biennially, not regularly or there may be no provision at all. It is observed that 83.36% of the establishments provide for increment in salaries/wages of their employees on an annual basis. Further, 9.14% establishments have no provision of providing any such increments. About 1% establishments provided increment on quarterly basis.

Tabl	e 2.11: Sector-w	ise Distribu	ution of	Establish	ments payi	ng Increm	ents to Em	ployees

	Total	1.02	1.60	83.36	0.71	4.16	9.14	100

2.26 In the sector-wise analysis, it is observed, across all nine sectors that highest percentage of establishments provide annual increments. However, it is also observed that about 29% establishments in the Financial Sector and 20% in the Construction sector have no provision of providing increments to employees. More than 1% of establishments in Manufacturing, Trade, Health, Accommodation& Restaurants and Financial Services provide quarterly increments to their workers.

Distribution of Establishments providing Subsidized Benefits to Employees

2.27 In order to ease the working conditions of employees and to go beyond just salaries/wages; some establishments provide different types of subsidised benefits. These may include accommodation, transport to and from work, food/Canteen, health facility for workers and their family members, education, Leave Travel Concession (LTC), etc. The survey enquired regarding these benefits and their extent. Table 2.12 below presents the different type of incentives given by the establishments to their workers.

Table 2.12: Sector wise Percentage of Establishments providing Subsidized Benefits to **Employees** Percentage of establishments providing subsidized benefits to employees by S. Sectors Leave No. **Transport** Accommoda Food/ Health Travel Concession facility Canteen facility Education Others tion (1) (2)(3)(4)(5)(6)(8)(9)(7)7.32 30.61 22.46 32.16 55.76 14.24 4.31 1 Manufacturing 35.35 38.42 29.55 52.83 14.89 16.09 2.92 2 Construction 17.05 13.44 22.12 38.07 5.45 8.75 3.57 3 Trade 22.75 55.74 36.18 33.73 16.53 33.71 4.56 4 **Transport** 19.27 19.51 20.45 54.90 32.08 25.44 5.33 5 Education 10.90 41.80 19.67 27.61 80.69 19.19 6.90 6 Health 62.18 11.34 79.00 41.57 5.16 7.87 3.31 Accommodation 7 & Restaurants 11.32 39.84 49.01 75.52 8.31 43.48 9.07 8 IT/BPOs Financial 27.11 22.55 19.90 54.00 16.42 42.46 9.52 9 Services 27.07 20.32 27.66 54.28 17.29 21.08 5.24 Total

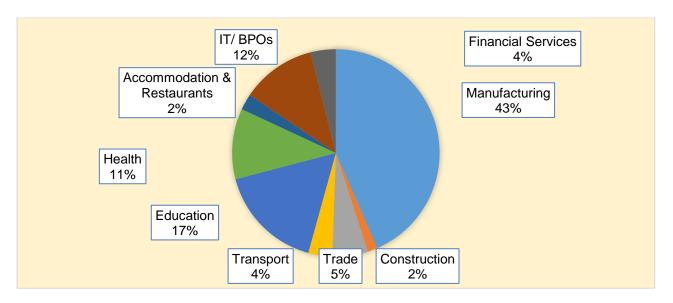

- 2.28 From the Table 2.12, it is seen, that more than 50% establishments provided Health facility for workers and their family members, followed by Food/ canteen facility at 27.66% and Accommodation at 27.07%. The lowest facility provided was subsidised education at 17.29%.
- 2.29 Sector-wise analysis reveals that more than 50% of the estimated establishments in Manufacturing, Construction, Transport, Education, Health, IT/BPOs and Financial Services, i.e. 7 out of 9 sectors, provide Health benefits to their employees. Accommodation& Restaurants sector provided maximum benefit of subsidised accommodation and subsidies food/canteen. More than 40% establishments falling under IT/BPO and Financial Services sector provided Leave Travel Concession to their employees.

3. Employment Estimates by Gender and other related Characteristics

2.30 This section gives the sector-wise various employment details covered in the survey, including different types of employment (self-employed, regular employee, contractual employee, fixed term employee, casual employee), gender distribution of employment, social security benefits being availed, etc.

Sector-wise Distribution of Estimated Number of Workers

2.31 In the preceding paragraphs the sector wise estimated workers in different sectors has been presented. As seen earlier, the highest percentage share of estimated workers was in manufacturing (43.39%), followed by Education (16.59%) and IT/BPO (11.61%). The lowest estimated employment has been found in Construction sector (1.53%). The same is presented in the following figure:

Gender wise Estimated Employment

2.32 The gender perspective of estimated number of workers across all the nine sectors is of great significance. The data elaborates the extent of female participation in non-farm sectors of the economy. The survey reveals that 69.71% workers were male and female workers constitute 30.29% of the total estimated workforce. The sector wise percentage distribution of workers by gender is presented below in Table 2.13.

Table	2.13: Sector wise	Percent	age Dis	stributio	n of Work	ers by C	ategory	and Gen	der
SI.		Self-	Employ	ed	Er	nployees		Total W	orkers

	Total	0.59	0.38	0.96	69.13	29.91	99.04	69.71	30.29

- 2.33 The QES survey covers nine selected sectors in the non-farm economy of India. Broadly, these fall within the purview of organised sector. As such, it is observed from the above Table 2.13 that about 99.04% of the workers were employees and percentage for self-employed was only 0.96%.
- 2.34 Among the self-employed, a higher proportion of male workers is observed in comparison to female workers. In self-employed category, it is seen that the proportion of women in financial services sector is higher as compared to male workers.
- 2.35 In the employees' category, it is observed that females are ahead of males in Health sector. The percentage of women workers is seen to be low in Construction (10.73%) and Transport (11.46%) sectors.
- 2.36 Overall, columns (9) and (10) of the above table 2.13 reveal that about 55.40% and 48.28% of female workers were in Health and Education sectors respectively.

Distribution of Workers by Type of Employment

2.37 Table 2.14 presents the sector-wise percentage distribution of estimated workers as per five different terms of employment, namely: a) Self-employed: those owners who work in their own establishments, b) Regular employee: employees who are not engaged on contractual basis, c) Contractual employee: employees appointed on contract through an agency, d) Fixed term employee: employees appointed by the establishment for a fixed period of time, e) Casual employee: employees who were engaged by establishments from time to time for casual work.

8	IT /BPOs	0.01	96.58	3.34	0.07	0.01
9	Financial Services	5.92	86.11	6.43	0.72	0.82
	Total	0.96	75.64	18.44	2.06	2.90

2.38 For all nine sectors covered in the survey, it is observed that 75.64% workers were regular employees, 18.44% were contractual employees, 2.90% were casual employees, about 2% were fixed term employees and less than 1% was self-employed. At the sectoral level, self-employed workers were found to be highest in Financial services sector (5.92%) followed by Accommodation & Restaurants sector (3.53%). The lowest percentage of self-employed workers was in IT/BPOs sector. Amongst the regular employees, IT/BPO sector

had the maximum share of 96.58% employees closely followed by financial services sector (86.11%). About 26.88% of the contractual workers were in establishments falling under manufacturing sector. The least number of contractual employees existed in establishments IT/BPO (3.34%) and Financial services (6.43%). Casual employees were mostly observed in establishments under Construction sector, i.e. about 10%. The share of Fixed Term employees was low across all sectors.

Percentage of Establishments providing Various Social Security Benefits

2.39 During the survey, the information in respect of various social security benefits implemented by the establishments has been captured. Broadly, the information in respect of important social sector benefits under the Employees' State Insurance Act, 1948, the Employees' Provident Funds and Miscellaneous Provisions Act, 1952, the Employees Compensation Act, 1923, the Maternity Benefit Act, 1961, the Payment of Gratuity Act, 1972, Payment of Bonus Act, 1965 and any other benefits has been collected from the establishment. The Table 2.15 below presents the sector wise percentage of establishments implementing various benefits for the workers.

	Table 2.15: Sector wise Percentage of Establishments providing various social security benefits											
S. No.	Sectors	percentage of establishments providing various social security benefits

	Total	49.62	66.95	37.37	40.62 66.05 27.27 57.07 59.09 55.22							

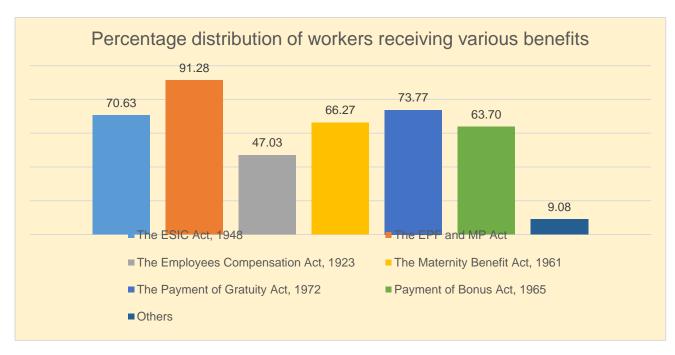

Note: ESIC- The Employees' State Insurance Act, 1948, EPFO- The Employees' Provident Funds and Miscellaneous Provisions Act, 1952, ECA- The Employees Compensation Act, 1923, MBA- The Maternity Benefit Act, 1961, PGA- The Payment of Gratuity Act, 1972, PBA- Payment of Bonus Act, 1965

2.40 It may be observed from the above Table 2.15 that maximum 66.95% of the establishments are providing social security benefits in their establishmentsunder the Employees' Provident Funds and Miscellaneous Provisions Act, 1952 followed by 58.98% under Payment of Gratuity Act,1972 and 57.97% under the Maternity Benefit Act, 1961. Further, about 55.32% of establishments are providing social security benefits in their establishments under the Payment of Bonus Act, 1965. About 50% of establishments are providing social security benefits in their establishments under the ESIC Act.

Percentage of Workers receiving Various Social Security Benefits

2.41 The survey attempted to ascertain the percentage distribution of estimated number of workers receiving various types of social security benefits across all nine sectors covered. The benefits included, The Employees' State Insurance Act, 1948, The Employees' Provident Funds and Miscellaneous Provisions Act, 1952, The Employees Compensation Act, 1923, The Maternity Benefit Act, 1961, The Payment of Gratuity Act, 1972, Payment of Bonus Act, 1965 and any other benefits. Workers may also be covered under multiple social security schemes.

2.42 It is evident from the figure as well as Table 2.16 given below that majority of the workers, about 91%, are receiving the EPF & MP Act, 1952 related benefits. The second most prevalent benefit received was under the Payment of Gratuity Act at about 74%. This was followed by the ESIC Act, 1948. The lowest share of all benefits received was under the Employees Compensation Act, 1923 (47%).

At the sectoral level, more than 90% workers were receiving benefits of the EPF & MP Act, especially in manufacturing sector, Construction sector, Transport sector, Health sector and IT/BPO sector. About 87% of workers in the Construction sector were provided benefits under the ESIC Act, 1948. Further, the Maternity Benefit Act related assistance was provided to workers in Construction sector (84.46%); Transport sector (82.97%), IT/BPO sector (84.52%) and Health sector (81.51%).

Percentage of Establishments proving Skill Development Programmes

2.44 The survey captures information on the skill development programmes provided by the establishments in the last quarter of the survey reference period. The information on the location of the training programmes has also been captured. The Table 2.17 below presents the sector wise percentage of establishments providing various skill development programmes, location of the training etc.

Tal	ole 2.17: Sec	tor-wise	percent	age of	Establi	shment	s provi	ding Ski	II Training

	Total	32.53	70.87	8.90	20.23	89.44	0.83	9.73	36.61

2.45 It may be seen from the above Table that 32.53% of the establishments at overall level provided the skill development programmes. The maximum percentages are observed in IT/BPO (68.73%), followed by 43.55% in Health Sector and 36.79% in the Education sector. Further, 70.87% of the establishments provided the skill development programmes in their establishments.

CONCEPTS AND DEFINITIONS

The important concepts and definitions adopted for the Quarterly Employment Survey (QES) are explained below:

A1.1 Enterprise

Enterprise is an undertaking engaged in production and/or distribution of goods and/or services other than for of the sole purpose own consumption, which has autonomy in respect of financial and investment decision making, as well as the authority for allocating resources for production of goods and services. It may be engaged in one or more economic activities at one or more locations. It is a sole legal unit. Thus. an enterprise having a few branches located in different places, each branch including headquarter (main office) is to be listed separately as an establishment.

A1.2 Establishment/ Unit

The establishment is a unit situated in a single location in which predominantly one kind of economic activity is carried out such that at least a part of the goods and/or services produced by the unit goes for sale. The establishment is a physical entity where mainly one entrepreneurial activity (or sometimes more than one, with no separate accounts) is carried out.

A1.3 Non-Agricultural/Non- Farm Establishment

Establishments engaged in activities other than agricultural activities (like crop production & plantation, growing of tea, coffee, rubber, tobacco etc.)

are termed as Non-farm establishments.

A1.4 Non-farm Sector

Goods or services producing segment of the economy other than farm activities is non-farm Sector. For this survey, non-farm sector includes Manufacturing, Construction, Trade, Transport, Education, Health, Accommodation & Restaurants, IT/BPOs and Financial Services.

A1.5 Employment/Worker

Employment in this survey refers to the number of persons Selfemployed or employed either directly or indirectly by the establishment on regular/casual basis/contract basis or fixed term employment.

All persons engaged in an economic activity/establishment either owner, members of the household working as co-owner or partner or helping the owner in running the establishment, whether hired or not. Besides regular and salaried employees, casual/daily wage labour would also be considered as workers for that establishment. For present survey all paid and unpaid apprentices will also be regarded as workers. Persons, who despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other bad weather. physical disability, festivals, social or religious functions or other contingencies necessitating temporary absence from work, will also constitute workers.

A1.6 Employee

Employee relates to the person engaged by the unit whether for wages or not, in work connected directly or indirectly with the process and includes all administrative, technical and clerical staff, supervision or management, as also labour in production/ services.

A1.7 Self Employed

Persons who operated their own establishment or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed. The essential feature of the self- employed is that they have autonomy (can decide how, where and when to produce) and economic independence (in respect of choice of market, scale of operation and finance) for carrying out their operation.

A1.8 Full Time Worker

Full-time worker is a Self Employed or an Employee who works for a minimum number of hours as defined/agreed for a particular occupation in the establishment.

A1.9 Part Time Worker

Part-time worker is a Self Employed or an employed person whose normal hours of work are less than that of comparable full-time workers.

A1.10 Regular Worker

The person who has worked in nonfarm enterprises and, in return, received salary or wages on a regular basis (i.e., not on the basis of daily or periodic renewal of work contract) is a regular worker. This category includes not only persons getting time wage but also persons receiving piece wage or salary and also paid apprentices, both full time and part-time. Regular Workers are employees appointed on an openended contract with no stipulated termination date, and who are entitled to benefits such as paid leave and medical aid contributions paid by employers. This excludes self-employed workers.

A1.11 Contract Worker

As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through contractor. Contract а workforce are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn is compensated by the establishment.

A1.12 Casual Worker

A person, who is casually engaged in non-farm enterprises and, in return, received wages according to the terms of the daily or periodic work contract, is a casual worker. This Category of Workers excludes Regular and Contract Worker.

A1.13 Fixed Term employment

For the purpose of present survey, the term Fixed Term Workers includes workers whose work are governed by a contract agreement either in writing or orally by the establishment directly, without involvement of the third party.

A1.14 Formal Skill Development and On-the-Job Training

Under the present survey, the information on formal skill

development programme conducted by the establishments and 'On the Job' Training has been collected separately, in view of the fact that former involves an element of certification of skill development training imparted to its workers.

A1.15 MSME

For the purpose of present survey, the definition of Micro, Small and Medium Enterprises has been used as per the latest notification of M/o of MSME dated 1st June, 2020. Under the current round of QES information has been collected on the current investment and turnover of the units and their registration status with UDYAM portal of MSME.

SAMPLING DESIGN AND ESTIMATION PROCEDURE

A2.1 Introduction

An Expert Group was constituted under the Chairmanship of Professor S.P. Mukherjee for examining and finalizing the coverage, sample size, assessing the resources required in terms of man-power, finance and finalization of Report for Quarterly Employment Survey (QES). Expert Group in a series of meetings discussed the various issues in details and finalized the sample size, sample design and survey methodology.

A2.2 Unit of Enumeration

The unit of enumeration for the present round of QES is the establishments with 10 or more workers in the nine selected sectors viz. Manufacturing, Construction, Trade, Transport, Education, Health, Accommodation & Restaurants, IT/ BPO and Financial Service activities.

A2.3 Classification of Industry

All nine sectors viz. Manufacturing (NIC-2008; 10 to 33), Construction (NIC-2008; 41, 42 & 43), Trade (NIC-2008; 45,46 & 47), Transport (NIC-2008; 49 to 53), Education (NIC-2008; 85), Health (NIC-2008; 86,87 & 88), Accommodation &Restaurants (NIC-2008; 55 &56), IT/BPO (NIC-2008; 62 & 63) and Financial Service activities (NIC-2008; 64, 65 &66) are classified as per the National Industrial Classification (NIC)-2008 at two-digit level.

A2.4 Sampling Frame

The sample needs to be a representative of establishment with 10 or more workers in nine sectors in India. The sampling frame used for present survey is all establishments with 10 or more workers in Sixth Economic Census (2012-13) in nine major sectors viz. Manufacturing, Construction, Trade, Transport, Education, Health, Accommodation & Restaurants, IT/BPOs and Financial Service activities and annual survey of industries (2019-20) for manufacturing sector.

A2.5 Reference Date

The second round QES covered whole of the Indian Union. Each quarterly employment survey covers a period of 3 months which is termed a round. The reference date in the most of the information items is the first day of the respective quarter during which the survey is conducted. For the present survey, the reference date is 1st July, 2022.

A2.6 Sampling Design

For selecting a fixed Panel of 15000 units a Stratified Simple Random Sampling (Without Replacement) has been adopted for the new series of QES following the recommendation of the Expert Group. The new series of QES provides employment estimates for nine sectors viz. Manufacturing, Construction, Trade, Transport, Education, Health, Accommodation &Restaurants, IT/BPOs and Financial Service sector selected on the basis of data of Sixth Economic Census (2012-13). The nine sectors account for around 85% of the total employment of units with 10 or more workers in the Sixth Economic Census.

A2.7 Sample Size

The sample size for the survey was 15000 units. Each of the nine sectors, within a State, is further divided into six size classes based on the size of employment. Accordingly, number of units are being selected proportionately (Proportional allocation) to the number of units in the population (frame) in the respective strata viz. State by Sector by Size Class by using Simple Random Sampling (Without Replacement). Allotment of minimum of 10 sample units, at a sector level in each state (i.e., State X Sector), was ensured, further ensuring the proportional representation in each size class.

A2.9 Estimation procedure:

A2.9.1 Notations:

i = subscript for i-th State/UT [i= 1 to 36]
j= subscript for j-th Sector [j= 1 to 9]
k= subscript for k-th Size Class [k= 1 to 6]
t= subscript for t-th unit
n= originally selected sample size

n2= effective sample size for level estimates of Q6

N= Total number of units in a particular stratum

y= observed value of characteristic y under estimation.

Y = population total of y

 \hat{Y} = estimates of population total Y for characteristics y.

 \mathbf{n}_{ijk} units are selected from \mathbf{N}_{ijk} units in ijk-th stratum with equal probability without replacement.

A2.9.2 Estimation of level of employment in Q6:

(i) Estimate of Y for k-th Size Class in the j-th Sector of i-th State denoted by $\hat{\mathbf{Y}}_{ijk}$ is obtained as:

$$\widehat{Y}_{ijk} = \frac{N_{ijk}}{n_{2ijk}} \sum_{t=1}^{n_{ijk}} y_{ijkt}$$

(ii) Estimate of Y for the j-th Sector of i-th State denoted by $\hat{\boldsymbol{Y}}_{ij}$ is given by

$$\widehat{Y}_{ij} = \sum_{k} Y_{ijk}$$

(iii) Overall estimate of Y at the all-India level for j-th Sector is obtained as

$$\widehat{Y}_j = \sum_i Y_{ij}$$

(iv) Overall estimate of Y at the all-India level for all Sectors is obtained by summing the stratum estimate over all strata belonging to all India:

$$\widehat{Y} = \sum_{j} \widehat{Y}_{j} = \sum_{i} \sum_{j} \sum_{k} \widehat{Y}_{ijk}$$

A2.9.2.1The inflation factor or 'multiplier' associated with a unit for estimating total employment is given by $\frac{N_{ijk}}{n_{2jik}}$

A2.9.3 Estimation of a ratio:

The ratio R of two estimates \hat{Y} and \hat{X} will be estimated as

$$\widehat{R} = \frac{\widehat{Y}}{\widehat{X}}$$

Description of Activity as per NIC-2008 code at 2-Digit Level

Nine Sectors of QES	NIC 2- digit level Code	Descriptions of the Activities
	10	Manufacture of food products
	11	Manufacture of beverages
	12	Manufacture of tobacco products
	13	Manufacture of textiles
	14	Manufacture of wearing apparel
	15	Manufacture of leather and related products
		Manufacture of wood and products of wood and cork,
	16	except furniture;
	17	Manufacture of paper and paper products
	18	Printing and reproduction of recorded media
	19	Manufacture of coke and refined petroleum products
	20	Manufacture of chemicals and chemical products
		Manufacture of pharmaceuticals, medicinal chemical
Manufacturing	21	and botanical products
Maridiacturing	22	Manufacture of rubber and plastics products
	23	Manufacture of other non-metallic mineral products
	24	Manufacture of basic metals
		Manufacture of fabricated metal products, except
	25	machinery and equipment
		Manufacture of computer, electronic and optical
	26	products
	27	Manufacture of electrical equipment
	28	Manufacture of machinery and equipment n.e.c.
	29	Manufacture of motor vehicles, trailers and semi-trailers
	30	Manufacture of other transport equipment
	31	Manufacture of furniture
	32	Other manufacturing
	33	Repair and installation of machinery and equipment
	41	Construction of buildings
Construction	42	Civil engineering
	43	Specialized construction activities
		Wholesale and retail trade and repair of motor vehicles
	45	and motorcycles
Trade		Wholesale trade, except of motor vehicles and
	46	motorcycles
	47	Retail trade, except of motor vehicles and motorcycles
	49	Land transport and transport via pipelines
Transport	50	Water transport
Tanoport	51	Air transport
	52	Warehousing and support activities for transportation

No. Y-16011/01/2020-ESA (LB)
Government of India
Ministry of Labour & Employment
(ESA Section)

Shram Shakti Bhavan, Rafi Marg, New Delhi, dated 9th September, 2020

ORDER

The Government hereby constitutes an Expert Group under the Chairmanship of Prof. S.P. Mukherjee to examine and finalize the schedules, sampling design and other technical details for surveys to be conducted by Labour Bureau on Migration Workers, three years. The composition of the Expert Group would be as follows:

Dr. S.P. Mukherjee, Emeritus Professor, University of Composition Kolkata, AD-276, Salt Lake City, Kolkata	
Allitanh Kundi. Di	
3 Sh. G.C. Manna, Ex-DG, CSC, Manna, Ex-DG, Ex-D	
4 Director General/Sonios L.	
S.C.O 28-31, Labour Bureau, Chandigarh AS&FA, Ministry of Labour & Employment	
On. W.C. Singhi, Ex-Senior Foods	Member
Sh. Anand Singh Bhal, Senior Economic Advisor, DPIIT Commerce & Industry	Member
Two Representatives of NSSO(and f	Member
& Implementation as nominated by the Chief Statistician of	Member
Representative of Institute of Human Development NIDM, Building, HPA Campus, Indraprastha Estate, New Delhi-110002	Member

10	Representative of V.V. Giri National Labour Institute, Sector-24, Noida	Member
11	Representative of National Council of Applied Economic Research (NCAER), Parisila Bhawan, 11, Indraprastha Estate, New Delhi-110002	Member
12	DDG(E), DGET, Ministry of Labour & Employment, Shram Shakti Bhawan, New Delhi	Member
13	DDG, ESA, Ministry of Labour & Employment, Shram Shakti BHawan, New Delhi	Member
14	DDG Labour Bureau, Shimla	Member Secretary*
	DDG, Labour Bureau, Chandigarh	Member Secretary*

The DDG dealing with the concerned survey will be member secretary for that survey.

- 2. The terms of reference of the Expert Group are:
- To examine and finalize the Schedule, sampling design, instruction manual . tabulation plan and other technical details for the conduct of Survey by Labour
- To assess the resource & time required for conducting the survey
- Examination and finalization of the methodology for processing of Data iii.
- To examine the results and finalize the Report
- 3. The expert group may also invite subject experts from within and/or outside the government and may co-opt members according to necessity.
- 4. Secretarial assistance to the Expert Group will be provided by the Labour Bureau.
- The Chairman and Co-chairman of the committee will be paid sitting fees of Rs/-6000 (Rupees Six thousand)and other non-official member of the committee will be paid honorarium @5000 (Rupees five thousand) per meeting.(either physical or online) and TAVDA will be as per entitlement of their last post held.
- 6. The expenditure on payment of TA& DA to non-official members and all other expenditure in connection with the work of the Expert Group shall be met from the funds of the Labour Bureau, Chandigarh, an attached office under the Ministry of Labour and Employment, while the expenditure on TA& DA in respect of official members will be met from the source from which their pay and allowance are drawn.
